Dear Sir/Madam,

Re: Planning Application for a wind energy development and all associated works at Largan, Boleysillagh, Cloonmeen, Toobrack, and Tullaghanrock, County Roscommon.

1.0 INTRODUCTION

On behalf of our client, Islandmore Wind Farm Limited ('the Applicant'), please find below notification of a Strategic Infrastructure Development (SID) planning application for the abovementioned proposed development in accordance with Section 37E of the *Planning & Development Act 2000 (as amended)* ('the 2000 Act').

2.0 PRE-APPLICATION CONSULTATION

The Applicant entered into pre-application consultations with An Coimisiún Pleanála (Reference ABP-321711-25), pursuant to Section 37B of the *Planning & Development Act 2000 (as amended)*. On 09 April 2026, An Coimisiún Pleanála served notice of its determination that the proposed development constitutes SID and that a planning application for same must be made directly to it.

3.0 DESCRIPTION OF THE PROPOSED DEVELOPMENT

The planning application seeks a 10-year planning permission for a proposed development generally described as follows:-

- 3 no. wind turbines with a hub height of 104 metres, a rotor diameter of 162 metres and an overall tip height of 185 metres;
- 7 no. wind turbines with a hub height of 82 metres, a rotor diameter of 136 metres and an overall tip height of 150 metres;
- All associated turbine foundations and crane hardstanding areas;
- All associated underground electrical and communications cabling;
- Construction of approximately 4 kilometres of wind farm access tracks;
- Construction of 6 no. site entrances and upgrade of 1 no. existing site entrance;
- 2 no. temporary construction compounds;
- 1 no. borrow pit which, when exhausted, will be utilised to permanently store excess excavated material;

- The storage, as required, of excavated material at dedicated spoil deposition areas;
- Felling of approximately 6.5 hectares of commercial forestry plantation to facilitate the construction and operation of wind farm infrastructure;
- All associated and ancillary site development, excavation, construction, landscaping and reinstatement works, permanent and temporary works to public roads along the turbine component haul route, the provision of site drainage infrastructure and environmental mitigation measures; and,
- A 40-year operational life from the date of commissioning of the entire proposed development.

4.0 ENVIRONMENTAL IMPACT ASSESSMENT

An Environmental Impact Assessment Report (EIAR) has been submitted with this planning application to inform the Environmental Impact Assessment (EIA) to be carried out by An Coimisiún Pleanála.

The EIAR is presented as 2 no. volumes, which should be read in conjunction with each other, as follows:-

- **Volume I** comprises the main EIAR text and follows a 'Grouped Format' structure where each environmental factor is assessed and presented as a separate chapter. The EIA Directive prescribes the range of environmental factors which should be used to organise descriptions of the environment and likely environmental effects. These have been supplemented with additional environmental factors owing to the characteristics of the proposed development under assessment, as follows:-
 - Chapter 1: Introduction;
 - Chapter 2: Assessment of Project Alternatives;
 - Chapter 3: Description of the Project;
 - Chapter 4: Population & Human Health;
 - Chapter 5: Biodiversity;
 - Chapter 6: Land & Soils;
 - Chapter 7: Water;
 - Chapter 8: Air Quality
 - Chapter 9: Climate;
 - Chapter 10: Landscape;
 - Chapter 11: Cultural Heritage;
 - Chapter 12: Noise & Vibration;
 - Chapter 13: Shadow Flicker;
 - Chapter 14: Material Assets; and,
 - Chapter 15: Interactions of the Foregoing.
- **Volume II** comprises a range of annexes, including technical data and reports, which informed the impact assessment provided in **Volume I** so as to

ensure the EIAR is transparently supported by evidence. All environmental mitigation measures, as prescribed within the EIAR, have also been compiled into a standalone document and submitted at **Volume II**.

A **Non-Technical Summary** of the EIAR is also provided as a separate standalone volume in order to facilitate the wider public concerned in their involvement in the statutory consultation during the planning application determination stage.

Please note that, in accordance with best practice, some minor, sensitive information has been redacted in the EIAR. This information can be provided upon request.

5.0 APPROPRIATE ASSESSMENT

Following the completion of a Stage 1 Appropriate Assessment Screening, a full NIS (Stage 2) has been prepared and submitted with this planning application. The NIS is presented as a separate, standalone document and submitted to inform a Habitats Directive Appropriate Assessment to be carried out by An Coimisiún Pleanála pursuant to Council Directive 92/43/EEC and Bird Directive 2009/147/EC. The NIS addresses the entirety of the project, including relevant cumulative, off-site, and secondary developments.

The NIS concludes; in light of best scientific knowledge; that there is reasonable scientific certainty that there will be no significant effects from the proposed development, either individually or in combination with other plans or projects, adversely affecting the conservation interests or conservation objectives of any Natura 2000 sites. It is therefore concluded that proposed development will not, beyond reasonable scientific doubt, adversely affect the integrity of any Natura 2000 site either directly or indirectly.

6.0 PLANNING APPLICATION DOCUMENTATION

This planning application is being made directly to An Coimisiún Pleanála under the provisions of Section 37E of the 2000 Act. An Coimisiún Pleanála has instructed the Applicant to notify An Taisce, as a prescribed body, of the lodgement of the planning application and to furnish you with a copy (or copies) of the planning application documentation.

All planning application and associated documentation is available to view at the dedicated project website; www.islandmorewindfarmsid.ie; which includes:-

- Planning Application Notification Letters to An Coimisiún Pleanála and Roscommon County Council;
- Planning Application Form;
- Site Notice;
- Newspaper Notices (2 no.);
- Letters of Landowner Consent;
- Statutory Undertaker Letter;
- Environmental Impact Assessment Portal Confirmation Notice;
- Planning Application Notification Letter issued to each prescribed body;
- Planning Application Drawings (see Schedule of Drawings attached to the Planning Application Form);

- Environmental Impact Assessment Report, including:
 - Volume I – Assessment of the Project;
 - Volume II – Technical Annexes in support of Volume I;
 - Non-Technical Summary; and
- Natura Impact Statement.

7.0 PLANNING APPLICATION PROCEDURE

You are advised that An Coimisiún Pleanála may, in respect of an application for permission, decide to:-

- (a) (i) grant the permission/approval; or
- (ii) make such modifications to the proposed development as it specifies in its decision and grant permission/approval in respect of the proposed development as so modified; or
- (iii) grant permission/approval in respect of part of the proposed development (with or without specified modifications of the foregoing kind), and any of the above decisions may be subject to or without conditions; or
- (b) Refuse to grant the permission/approval.

Submissions or observations may be made only to An Coimisiún Pleanála, 64 Marlborough Street, Dublin 1; or via the An Coimisiún Pleanála website www.pleanala.ie/en-ie/observations; relating to:-

- (i) The implications of the proposed development for proper planning and sustainable development;
- (ii) The likely effects on the environment of the proposed development; and
- (iii) The likely significant effects of the proposed development on a European site, if carried out.

Any submissions or observations from An Taisce must be received by An Coimisiún Pleanála no later than 5.30p.m. on 16 December 2026.

8.0 CONCLUSION

This planning application is being lodged with An Coimisiún Pleanála following a determination that the proposed development constitutes a SID. Government policy recognises that onshore wind energy, as a proven and cost effective technology in the context of Ireland's abundant wind resource, will continue to be the major contributor to Ireland's renewable electricity generation to 2030 and the generation of electricity from the proposed development will make a substantial contribution to the reduction of fossil fuel generated electricity and the abatement of greenhouse gas emissions.

The EIAR and NIS submitted with this planning application provide a comprehensive assessment of the likelihood of significant adverse environmental effects arising as a result of the proposed development individually and in combination with other existing, permitted and proposed developments. Overall, it is assessed that any likely adverse environmental effects resulting from the proposed development can be managed and mitigated and that there are lasting social and environmental benefits

as a result of the proposed development.

We trust that the documentation provided is in order and is sufficient for your consideration of this proposed development. Should you have any queries in relation to any of the information enclosed, please do not hesitate to contact this office.

Yours sincerely,

Dear Sir/Madam,

Re: Planning Application for a wind energy development and all associated works at Largan, Boleysillagh, Cloonmeen, Toobrack, and Tullaghanrock, County Roscommon.

1.0 INTRODUCTION

On behalf of our client, Islandmore Wind Farm Limited ('the Applicant'), please find below notification of a Strategic Infrastructure Development (SID) planning application for the abovementioned proposed development in accordance with Section 37E of the *Planning & Development Act 2000 (as amended)* ('the 2000 Act').

2.0 PRE-APPLICATION CONSULTATION

The Applicant entered into pre-application consultations with An Coimisiún Pleanála (Reference ABP-321711-25), pursuant to Section 37B of the *Planning & Development Act 2000 (as amended)*. On 09 April 2026, An Coimisiún Pleanála served notice of its determination that the proposed development constitutes SID and that a planning application for same must be made directly to it.

3.0 DESCRIPTION OF THE PROPOSED DEVELOPMENT

The planning application seeks a 10-year planning permission for a proposed development generally described as follows:-

- 3 no. wind turbines with a hub height of 104 metres, a rotor diameter of 162 metres and an overall tip height of 185 metres;
- 7 no. wind turbines with a hub height of 82 metres, a rotor diameter of 136 metres and an overall tip height of 150 metres;
- All associated turbine foundations and crane hardstanding areas;
- All associated underground electrical and communications cabling;
- Construction of approximately 4 kilometres of wind farm access tracks;
- Construction of 6 no. site entrances and upgrade of 1 no. existing site entrance;
- 2 no. temporary construction compounds;
- 1 no. borrow pit which, when exhausted, will be utilised to permanently store excess excavated material;

- The storage, as required, of excavated material at dedicated spoil deposition areas;
- Felling of approximately 6.5 hectares of commercial forestry plantation to facilitate the construction and operation of wind farm infrastructure;
- All associated and ancillary site development, excavation, construction, landscaping and reinstatement works, permanent and temporary works to public roads along the turbine component haul route, the provision of site drainage infrastructure and environmental mitigation measures; and,
- A 40-year operational life from the date of commissioning of the entire proposed development.

4.0 ENVIRONMENTAL IMPACT ASSESSMENT

An Environmental Impact Assessment Report (EIAR) has been submitted with this planning application to inform the Environmental Impact Assessment (EIA) to be carried out by An Coimisiún Pleanála.

The EIAR is presented as 2 no. volumes, which should be read in conjunction with each other, as follows:-

- **Volume I** comprises the main EIAR text and follows a 'Grouped Format' structure where each environmental factor is assessed and presented as a separate chapter. The EIA Directive prescribes the range of environmental factors which should be used to organise descriptions of the environment and likely environmental effects. These have been supplemented with additional environmental factors owing to the characteristics of the proposed development under assessment, as follows:-
 - Chapter 1: Introduction;
 - Chapter 2: Assessment of Project Alternatives;
 - Chapter 3: Description of the Project;
 - Chapter 4: Population & Human Health;
 - Chapter 5: Biodiversity;
 - Chapter 6: Land & Soils;
 - Chapter 7: Water;
 - Chapter 8: Air Quality
 - Chapter 9: Climate;
 - Chapter 10: Landscape;
 - Chapter 11: Cultural Heritage;
 - Chapter 12: Noise & Vibration;
 - Chapter 13: Shadow Flicker;
 - Chapter 14: Material Assets; and,
 - Chapter 15: Interactions of the Foregoing.
- **Volume II** comprises a range of annexes, including technical data and reports, which informed the impact assessment provided in **Volume I** so as to

ensure the EIAR is transparently supported by evidence. All environmental mitigation measures, as prescribed within the EIAR, have also been compiled into a standalone document and submitted at **Volume II**.

A **Non-Technical Summary** of the EIAR is also provided as a separate standalone volume in order to facilitate the wider public concerned in their involvement in the statutory consultation during the planning application determination stage.

Please note that, in accordance with best practice, some minor, sensitive information has been redacted in the EIAR. This information can be provided upon request.

5.0 APPROPRIATE ASSESSMENT

Following the completion of a Stage 1 Appropriate Assessment Screening, a full NIS (Stage 2) has been prepared and submitted with this planning application. The NIS is presented as a separate, standalone document and submitted to inform a Habitats Directive Appropriate Assessment to be carried out by An Coimisiún Pleanála pursuant to Council Directive 92/43/EEC and Bird Directive 2009/147/EC. The NIS addresses the entirety of the project, including relevant cumulative, off-site, and secondary developments.

The NIS concludes; in light of best scientific knowledge; that there is reasonable scientific certainty that there will be no significant effects from the proposed development, either individually or in combination with other plans or projects, adversely affecting the conservation interests or conservation objectives of any Natura 2000 sites. It is therefore concluded that proposed development will not, beyond reasonable scientific doubt, adversely affect the integrity of any Natura 2000 site either directly or indirectly.

6.0 PLANNING APPLICATION DOCUMENTATION

This planning application is being made directly to An Coimisiún Pleanála under the provisions of Section 37E of the 2000 Act. An Coimisiún Pleanála has instructed the Applicant to notify An Chomhairle Ealaíon (The Arts Council), as a prescribed body, of the lodgement of the planning application and to furnish you with a copy (or copies) of the planning application documentation.

All planning application and associated documentation is available to view at the dedicated project website; www.islandmorewindfarmsid.ie; which includes:-

- Planning Application Notification Letters to An Coimisiún Pleanála and Roscommon County Council;
- Planning Application Form;
- Site Notice;
- Newspaper Notices (2 no.);
- Letters of Landowner Consent;
- Statutory Undertaker Letter;
- Environmental Impact Assessment Portal Confirmation Notice;
- Planning Application Notification Letter issued to each prescribed body;
- Planning Application Drawings (see Schedule of Drawings attached to the Planning Application Form);

- Environmental Impact Assessment Report, including:
 - Volume I – Assessment of the Project;
 - Volume II – Technical Annexes in support of Volume I;
 - Non-Technical Summary; and
- Natura Impact Statement.

7.0 PLANNING APPLICATION PROCEDURE

You are advised that An Coimisiún Pleanála may, in respect of an application for permission, decide to:-

- (a) (i) grant the permission/approval; or
- (ii) make such modifications to the proposed development as it specifies in its decision and grant permission/approval in respect of the proposed development as so modified; or
- (iii) grant permission/approval in respect of part of the proposed development (with or without specified modifications of the foregoing kind), and any of the above decisions may be subject to or without conditions; or
- (b) Refuse to grant the permission/approval.

Submissions or observations may be made only to An Coimisiún Pleanála, 64 Marlborough Street, Dublin 1; or via the An Coimisiún Pleanála website www.pleanala.ie/en-ie/observations; relating to:-

- (i) The implications of the proposed development for proper planning and sustainable development;
- (ii) The likely effects on the environment of the proposed development; and
- (iii) The likely significant effects of the proposed development on a European site, if carried out.

Any submissions or observations from An Chomhairle Ealaíoin (The Arts Council) must be received by An Coimisiún Pleanála no later than 5.30p.m. on 16 December 2026.

8.0 CONCLUSION

This planning application is being lodged with An Coimisiún Pleanála following a determination that the proposed development constitutes a SID. Government policy recognises that onshore wind energy, as a proven and cost effective technology in the context of Ireland's abundant wind resource, will continue to be the major contributor to Ireland's renewable electricity generation to 2030 and the generation of electricity from the proposed development will make a substantial contribution to the reduction of fossil fuel generated electricity and the abatement of greenhouse gas emissions.

The EIAR and NIS submitted with this planning application provide a comprehensive assessment of the likelihood of significant adverse environmental effects arising as a result of the proposed development individually and in combination with other existing, permitted and proposed developments. Overall, it is assessed that any likely adverse environmental effects resulting from the proposed development can be managed and mitigated and that there are lasting social and environmental benefits

as a result of the proposed development.

We trust that the documentation provided is in order and is sufficient for your consideration of this proposed development. Should you have any queries in relation to any of the information enclosed, please do not hesitate to contact this office.

Dear Sir/Madam,

Re: Planning Application for a wind energy development and all associated works at Largan, Boleysillagh, Cloonmeen, Toobrack, and Tullaghanrock, County Roscommon.

1.0 INTRODUCTION

On behalf of our client, Islandmore Wind Farm Limited ('the Applicant'), please find below notification of a Strategic Infrastructure Development (SID) planning application for the abovementioned proposed development in accordance with Section 37E of the *Planning & Development Act 2000 (as amended)* ('the 2000 Act').

2.0 PRE-APPLICATION CONSULTATION

The Applicant entered into pre-application consultations with An Coimisiún Pleanála (Reference ABP-321711-25), pursuant to Section 37B of the 2000 Act. On 09 April 2026, An Coimisiún Pleanála served notice of its determination that the proposed development constitutes SID and that a planning application for same must be made directly to it.

3.0 DESCRIPTION OF THE PROPOSED DEVELOPMENT

The planning application seeks a 10-year planning permission for a proposed development generally described as follows:-

- 3 no. wind turbines with a hub height of 104 metres, a rotor diameter of 162 metres and an overall tip height of 185 metres;
- 7 no. wind turbines with a hub height of 82 metres, a rotor diameter of 136 metres and an overall tip height of 150 metres;
- All associated turbine foundations and crane hardstanding areas;
- All associated underground electrical and communications cabling;
- Construction of approximately 4 kilometres of wind farm access tracks;
- Construction of 6 no. site entrances and upgrade of 1 no. existing site entrance;
- 2 no. temporary construction compounds;

- 1 no. borrow pit which, when exhausted, will be utilised to permanently store excess excavated material;
- The storage, as required, of excavated material at dedicated spoil deposition areas;
- Felling of approximately 6.5 hectares of commercial forestry plantation to facilitate the construction and operation of wind farm infrastructure;
- All associated and ancillary site development, excavation, construction, landscaping and reinstatement works, permanent and temporary works to public roads along the turbine component haul route, the provision of site drainage infrastructure and environmental mitigation measures; and,
- A 40-year operational life from the date of commissioning of the entire proposed development.

4.0 ENVIRONMENTAL IMPACT ASSESSMENT

An Environmental Impact Assessment Report (EIAR) has been submitted with this planning application to inform the Environmental Impact Assessment (EIA) to be carried out by An Coimisiún Pleanála.

The EIAR is presented as 2 no. volumes, which should be read in conjunction with each other, as follows:-

- **Volume I** comprises the main EIAR text and follows a 'Grouped Format' structure where each environmental factor is assessed and presented as a separate chapter. The EIA Directive prescribes the range of environmental factors which should be used to organise descriptions of the environment and likely environmental effects. These have been supplemented with additional environmental factors owing to the characteristics of the proposed development under assessment, as follows:-
 - Chapter 1: Introduction;
 - Chapter 2: Assessment of Project Alternatives;
 - Chapter 3: Description of the Project;
 - Chapter 4: Population & Human Health;
 - Chapter 5: Biodiversity;
 - Chapter 6: Land & Soils;
 - Chapter 7: Water;
 - Chapter 8: Air Quality
 - Chapter 9: Climate;
 - Chapter 10: Landscape;
 - Chapter 11: Cultural Heritage;
 - Chapter 12: Noise & Vibration;
 - Chapter 13: Shadow Flicker;
 - Chapter 14: Material Assets; and,
 - Chapter 15: Interactions of the Foregoing.

- **Volume II** comprises a range of annexes, including technical data and reports, which informed the impact assessment provided in **Volume I** so as to ensure the EIAR is transparently supported by evidence. All environmental mitigation measures, as prescribed within the EIAR, have also been compiled into a standalone document and submitted at **Volume II**.

A **Non-Technical Summary** of the EIAR is also provided as a separate standalone volume in order to facilitate the wider public concerned in their involvement in the statutory consultation during the planning application determination stage.

Please note that, in accordance with best practice, some minor, sensitive information has been redacted in the EIAR. This information can be provided upon request.

5.0 APPROPRIATE ASSESSMENT

Following the completion of a Stage 1 Appropriate Assessment Screening, a full NIS (Stage 2) has been prepared and submitted with this planning application. The NIS is presented as a separate, standalone document and submitted to inform a Habitats Directive Appropriate Assessment to be carried out by An Coimisiún Pleanála pursuant to Council Directive 92/43/EEC and Bird Directive 2009/147/EC. The NIS addresses the entirety of the project, including relevant cumulative, off-site, and secondary developments.

The NIS concludes; in light of best scientific knowledge; that there is reasonable scientific certainty that there will be no significant effects from the proposed development, either individually or in combination with other plans or projects, adversely affecting the conservation interests or conservation objectives of any Natura 2000 sites. It is therefore concluded that proposed development will not, beyond reasonable scientific doubt, adversely affect the integrity of any Natura 2000 site either directly or indirectly.

6.0 PLANNING APPLICATION DOCUMENTATION

This planning application is being made directly to An Coimisiún Pleanála under the provisions of Section 37E of the 2000 Act. An Coimisiún Pleanála has instructed the Applicant to notify the Commission for Regulation of Utilities, as a prescribed body, of the lodgement of the planning application and to furnish you with a copy (or copies) of the planning application documentation.

All planning application and associated documentation is available to view at the dedicated project website; www.islandmorewindfarmsid.ie; which includes:-

- Planning Application Notification Letters to An Coimisiún Pleanála and Roscommon County Council;
- Planning Application Form;
- Site Notice;
- Newspaper Notices (2 no.);
- Letters of Landowner Consent;
- Statutory Undertaker Letter;
- Environmental Impact Assessment Portal Confirmation Notice;
- Planning Application Notification Letter issued to each prescribed body;

- Planning Application Drawings (see Schedule of Drawings attached to the Planning Application Form);
- Environmental Impact Assessment Report, including:
 - Volume I – Assessment of the Project;
 - Volume II – Technical Annexes in support of Volume I;
 - Non-Technical Summary; and
- Natura Impact Statement.

7.0 PLANNING APPLICATION PROCEDURE

You are advised that An Coimisiún Pleanála may, in respect of an application for permission, decide to:-

- (a) (i) grant the permission/approval; or
- (ii) make such modifications to the proposed development as it specifies in its decision and grant permission/approval in respect of the proposed development as so modified; or
- (iii) grant permission/approval in respect of part of the proposed development (with or without specified modifications of the foregoing kind), and any of the above decisions may be subject to or without conditions; or
- (b) Refuse to grant the permission/approval.

Submissions or observations may be made only to An Coimisiún Pleanála, 64 Marlborough Street, Dublin 1; or via the An Coimisiún Pleanála website www.pleanala.ie/en-ie/observations; relating to:-

- (i) The implications of the proposed development for proper planning and sustainable development;
- (ii) The likely effects on the environment of the proposed development; and
- (iii) The likely significant effects of the proposed development on a European site, if carried out.

Any submissions or observations from the Commission for Regulation of Utilities must be received by An Coimisiún Pleanála no later than 5.30p.m. on 16 December 2026.

8.0 CONCLUSION

This planning application is being lodged with An Coimisiún Pleanála following a determination that the proposed development constitutes a SID. Government policy recognises that onshore wind energy, as a proven and cost effective technology in the context of Ireland's abundant wind resource, will continue to be the major contributor to Ireland's renewable electricity generation to 2030 and the generation of electricity from the proposed development will make a substantial contribution to the reduction of fossil fuel generated electricity and the abatement of greenhouse gas emissions.

The EIAR and NIS submitted with this planning application provide a comprehensive assessment of the likelihood of significant adverse environmental effects arising as a result of the proposed development individually and in combination with other existing, permitted and proposed developments. Overall, it is assessed that any likely

adverse environmental effects resulting from the proposed development can be managed and mitigated and that there are lasting social and environmental benefits as a result of the proposed development.

We trust that the documentation provided is in order and is sufficient for your consideration of this proposed development. Should you have any queries in relation to any of the information enclosed, please do not hesitate to contact this office.

Dear Sir/Madam,

Re: Planning Application for a wind energy development and all associated works at Largan, Boleysillagh, Cloonmeen, Toobrack, and Tullaghanrock, County Roscommon.

1.0 INTRODUCTION

On behalf of our client, Islandmore Wind Farm Limited ('the Applicant'), please find below notification of a Strategic Infrastructure Development (SID) planning application for the abovementioned proposed development in accordance with Section 37E of the *Planning & Development Act 2000 (as amended)* ('the 2000 Act').

2.0 PRE-APPLICATION CONSULTATION

The Applicant entered into pre-application consultations with An Coimisiún Pleanála (Reference ABP-321711-25), pursuant to Section 37B of the 2000 Act. On 09 April 2026, An Coimisiún Pleanála served notice of its determination that the proposed development constitutes SID and that a planning application for same must be made directly to it.

3.0 DESCRIPTION OF THE PROPOSED DEVELOPMENT

The planning application seeks a 10-year planning permission for a proposed development generally described as follows:-

- 3 no. wind turbines with a hub height of 104 metres, a rotor diameter of 162 metres and an overall tip height of 185 metres;
- 7 no. wind turbines with a hub height of 82 metres, a rotor diameter of 136 metres and an overall tip height of 150 metres;
- All associated turbine foundations and crane hardstanding areas;
- All associated underground electrical and communications cabling;
- Construction of approximately 4 kilometres of wind farm access tracks;
- Construction of 6 no. site entrances and upgrade of 1 no. existing site entrance;
- 2 no. temporary construction compounds;
- 1 no. borrow pit which, when exhausted, will be utilised to permanently store excess excavated material;

- The storage, as required, of excavated material at dedicated spoil deposition areas;
- Felling of approximately 6.5 hectares of commercial forestry plantation to facilitate the construction and operation of wind farm infrastructure;
- All associated and ancillary site development, excavation, construction, landscaping and reinstatement works, permanent and temporary works to public roads along the turbine component haul route, the provision of site drainage infrastructure and environmental mitigation measures; and,
- A 40-year operational life from the date of commissioning of the entire proposed development.

4.0 ENVIRONMENTAL IMPACT ASSESSMENT

An Environmental Impact Assessment Report (EIAR) has been submitted with this planning application to inform the Environmental Impact Assessment (EIA) to be carried out by An Coimisiún Pleanála.

The EIAR is presented as 2 no. volumes, which should be read in conjunction with each other, as follows:-

- **Volume I** comprises the main EIAR text and follows a 'Grouped Format' structure where each environmental factor is assessed and presented as a separate chapter. The EIA Directive prescribes the range of environmental factors which should be used to organise descriptions of the environment and likely environmental effects. These have been supplemented with additional environmental factors owing to the characteristics of the proposed development under assessment, as follows:-
 - Chapter 1: Introduction;
 - Chapter 2: Assessment of Project Alternatives;
 - Chapter 3: Description of the Project;
 - Chapter 4: Population & Human Health;
 - Chapter 5: Biodiversity;
 - Chapter 6: Land & Soils;
 - Chapter 7: Water;
 - Chapter 8: Air Quality
 - Chapter 9: Climate;
 - Chapter 10: Landscape;
 - Chapter 11: Cultural Heritage;
 - Chapter 12: Noise & Vibration;
 - Chapter 13: Shadow Flicker;
 - Chapter 14: Material Assets; and,
 - Chapter 15: Interactions of the Foregoing.
- **Volume II** comprises a range of annexes, including technical data and reports, which informed the impact assessment provided in **Volume I** so as to

ensure the EIAR is transparently supported by evidence. All environmental mitigation measures, as prescribed within the EIAR, have also been compiled into a standalone document and submitted at **Volume II**.

A **Non-Technical Summary** of the EIAR is also provided as a separate standalone volume in order to facilitate the wider public concerned in their involvement in the statutory consultation during the planning application determination stage.

Please note that, in accordance with best practice, some minor, sensitive information has been redacted in the EIAR. This information can be provided upon request.

5.0 APPROPRIATE ASSESSMENT

Following the completion of a Stage 1 Appropriate Assessment Screening, a full NIS (Stage 2) has been prepared and submitted with this planning application. The NIS is presented as a separate, standalone document and submitted to inform a Habitats Directive Appropriate Assessment to be carried out by An Coimisiún Pleanála pursuant to Council Directive 92/43/EEC and Bird Directive 2009/147/EC. The NIS addresses the entirety of the project, including relevant cumulative, off-site, and secondary developments.

The NIS concludes; in light of best scientific knowledge; that there is reasonable scientific certainty that there will be no significant effects from the proposed development, either individually or in combination with other plans or projects, adversely affecting the conservation interests or conservation objectives of any Natura 2000 sites. It is therefore concluded that proposed development will not, beyond reasonable scientific doubt, adversely affect the integrity of any Natura 2000 site either directly or indirectly.

6.0 PLANNING APPLICATION DOCUMENTATION

This planning application is being made directly to An Coimisiún Pleanála under the provisions of Section 37E of the 2000 Act. An Coimisiún Pleanála has instructed the Applicant to notify the Department of Agriculture, Food and the Marine, as a prescribed body, of the lodgement of the planning application and to furnish you with a copy (or copies) of the planning application documentation.

All planning application and associated documentation is available to view at the dedicated project website; www.islandmorewindfarmsid.ie; which includes:-

- Planning Application Notification Letters to An Coimisiún Pleanála and Roscommon County Council;
- Planning Application Form;
- Site Notice;
- Newspaper Notices (2 no.);
- Letters of Landowner Consent;
- Statutory Undertaker Letter;
- Environmental Impact Assessment Portal Confirmation Notice;
- Planning Application Notification Letter issued to each prescribed body;
- Planning Application Drawings (see Schedule of Drawings attached to the Planning Application Form);

- Environmental Impact Assessment Report, including:
 - Volume I – Assessment of the Project;
 - Volume II – Technical Annexes in support of Volume I;
 - Non-Technical Summary; and
- Natura Impact Statement.

7.0 PLANNING APPLICATION PROCEDURE

You are advised that An Coimisiún Pleanála may, in respect of an application for permission, decide to:-

- (a) (i) grant the permission/approval; or
- (ii) make such modifications to the proposed development as it specifies in its decision and grant permission/approval in respect of the proposed development as so modified; or
- (iii) grant permission/approval in respect of part of the proposed development (with or without specified modifications of the foregoing kind), and any of the above decisions may be subject to or without conditions; or
- (b) Refuse to grant the permission/approval.

Submissions or observations may be made only to An Coimisiún Pleanála, 64 Marlborough Street, Dublin 1; or via the An Coimisiún Pleanála website www.pleanala.ie/en-ie/observations; relating to:-

- (i) The implications of the proposed development for proper planning and sustainable development;
- (ii) The likely effects on the environment of the proposed development; and
- (iii) The likely significant effects of the proposed development on a European site, if carried out.

Any submissions or observations from the Department must be received by An Coimisiún Pleanála no later than 5.30p.m. on 16 December 2026.

8.0 CONCLUSION

This planning application is being lodged with An Coimisiún Pleanála following a determination that the proposed development constitutes a SID. Government policy recognises that onshore wind energy, as a proven and cost effective technology in the context of Ireland's abundant wind resource, will continue to be the major contributor to Ireland's renewable electricity generation to 2030 and the generation of electricity from the proposed development will make a substantial contribution to the reduction of fossil fuel generated electricity and the abatement of greenhouse gas emissions.

The EIAR and NIS submitted with this planning application provide a comprehensive assessment of the likelihood of significant adverse environmental effects arising as a result of the proposed development individually and in combination with other existing, permitted and proposed developments. Overall, it is assessed that any likely adverse environmental effects resulting from the proposed development can be managed and mitigated and that there are lasting social and environmental benefits

as a result of the proposed development.

We trust that the documentation provided is in order and is sufficient for your consideration of this proposed development. Should you have any queries in relation to any of the information enclosed, please do not hesitate to contact this office.

Yours sincerely,

Your Ref: --/--

Dear Sir/Madam,

Re: Planning Application for a wind energy development and all associated works at Largan, Boleysillagh, Cloonmeen, Toobrack, and Tullaghanrock, County Roscommon.

1.0 INTRODUCTION

On behalf of our client, Islandmore Wind Farm Limited ('the Applicant'), please find below notification of a Strategic Infrastructure Development (SID) planning application for the abovementioned proposed development in accordance with Section 37E of the *Planning & Development Act 2000 (as amended)* ('the 2000 Act').

2.0 PRE-APPLICATION CONSULTATION

The Applicant entered into pre-application consultations with An Coimisiún Pleanála (Reference ABP-321711-25), pursuant to Section 37B of the 2000 Act. On 09 April 2026, An Coimisiún Pleanála served notice of its determination that the proposed development constitutes SID and that a planning application for same must be made directly to it.

3.0 DESCRIPTION OF THE PROPOSED DEVELOPMENT

The planning application seeks a 10-year planning permission for a proposed development generally described as follows:-

- 3 no. wind turbines with a hub height of 104 metres, a rotor diameter of 162 metres and an overall tip height of 185 metres;
- 7 no. wind turbines with a hub height of 82 metres, a rotor diameter of 136 metres and an overall tip height of 150 metres;
- All associated turbine foundations and crane hardstanding areas;
- All associated underground electrical and communications cabling;
- Construction of approximately 4 kilometres of wind farm access tracks;
- Construction of 6 no. site entrances and upgrade of 1 no. existing site entrance;
- 2 no. temporary construction compounds;
- 1 no. borrow pit which, when exhausted, will be utilised to permanently store excess excavated material;

- The storage, as required, of excavated material at dedicated spoil deposition areas;
- Felling of approximately 6.5 hectares of commercial forestry plantation to facilitate the construction and operation of wind farm infrastructure;
- All associated and ancillary site development, excavation, construction, landscaping and reinstatement works, permanent and temporary works to public roads along the turbine component haul route, the provision of site drainage infrastructure and environmental mitigation measures; and,
- A 40-year operational life from the date of commissioning of the entire proposed development.

4.0 ENVIRONMENTAL IMPACT ASSESSMENT

An Environmental Impact Assessment Report (EIAR) has been submitted with this planning application to inform the Environmental Impact Assessment (EIA) to be carried out by An Coimisiún Pleanála.

The EIAR is presented as 2 no. volumes, which should be read in conjunction with each other, as follows:-

- **Volume I** comprises the main EIAR text and follows a 'Grouped Format' structure where each environmental factor is assessed and presented as a separate chapter. The EIA Directive prescribes the range of environmental factors which should be used to organise descriptions of the environment and likely environmental effects. These have been supplemented with additional environmental factors owing to the characteristics of the proposed development under assessment, as follows:-
 - Chapter 1: Introduction;
 - Chapter 2: Assessment of Project Alternatives;
 - Chapter 3: Description of the Project;
 - Chapter 4: Population & Human Health;
 - Chapter 5: Biodiversity;
 - Chapter 6: Land & Soils;
 - Chapter 7: Water;
 - Chapter 8: Air Quality
 - Chapter 9: Climate;
 - Chapter 10: Landscape;
 - Chapter 11: Cultural Heritage;
 - Chapter 12: Noise & Vibration;
 - Chapter 13: Shadow Flicker;
 - Chapter 14: Material Assets; and,
 - Chapter 15: Interactions of the Foregoing.
- **Volume II** comprises a range of annexes, including technical data and reports, which informed the impact assessment provided in **Volume I** so as to

ensure the EIAR is transparently supported by evidence. All environmental mitigation measures, as prescribed within the EIAR, have also been compiled into a standalone document and submitted at **Volume II**.

A **Non-Technical Summary** of the EIAR is also provided as a separate standalone volume in order to facilitate the wider public concerned in their involvement in the statutory consultation during the planning application determination stage.

Please note that, in accordance with best practice, some minor, sensitive information has been redacted in the EIAR. This information can be provided upon request.

5.0 APPROPRIATE ASSESSMENT

Following the completion of a Stage 1 Appropriate Assessment Screening, a full NIS (Stage 2) has been prepared and submitted with this planning application. The NIS is presented as a separate, standalone document and submitted to inform a Habitats Directive Appropriate Assessment to be carried out by An Coimisiún Pleanála pursuant to Council Directive 92/43/EEC and Bird Directive 2009/147/EC. The NIS addresses the entirety of the project, including relevant cumulative, off-site, and secondary developments.

The NIS concludes; in light of best scientific knowledge; that there is reasonable scientific certainty that there will be no significant effects from the proposed development, either individually or in combination with other plans or projects, adversely affecting the conservation interests or conservation objectives of any Natura 2000 sites. It is therefore concluded that proposed development will not, beyond reasonable scientific doubt, adversely affect the integrity of any Natura 2000 site either directly or indirectly.

6.0 PLANNING APPLICATION DOCUMENTATION

This planning application is being made directly to An Coimisiún Pleanála under the provisions of Section 37E of the 2000 Act. An Coimisiún Pleanála has instructed the Applicant to notify the Department of Culture, Communications and Sport, as a prescribed body, of the lodgement of the planning application and to furnish you with a copy (or copies) of the planning application documentation.

All planning application and associated documentation is available to view at the dedicated project website; www.islandmorewindfarmsid.ie; which includes:-

- Planning Application Notification Letters to An Coimisiún Pleanála and Roscommon County Council;
- Planning Application Form;
- Site Notice;
- Newspaper Notices (2 no.);
- Letters of Landowner Consent;
- Statutory Undertaker Letter;
- Environmental Impact Assessment Portal Confirmation Notice;
- Planning Application Notification Letter issued to each prescribed body;
- Planning Application Drawings (see Schedule of Drawings attached to the Planning Application Form);

- Environmental Impact Assessment Report, including:
 - Volume I – Assessment of the Project;
 - Volume II – Technical Annexes in support of Volume I;
 - Non-Technical Summary; and
- Natura Impact Statement.

7.0 PLANNING APPLICATION PROCEDURE

You are advised that An Coimisiún Pleanála may, in respect of an application for permission, decide to:-

- (a) (i) grant the permission/approval; or
- (ii) make such modifications to the proposed development as it specifies in its decision and grant permission/approval in respect of the proposed development as so modified; or
- (iii) grant permission/approval in respect of part of the proposed development (with or without specified modifications of the foregoing kind), and any of the above decisions may be subject to or without conditions; or
- (b) Refuse to grant the permission/approval.

Submissions or observations may be made only to An Coimisiún Pleanála, 64 Marlborough Street, Dublin 1; or via the An Coimisiún Pleanála website www.pleanala.ie/en-ie/observations; relating to:-

- (i) The implications of the proposed development for proper planning and sustainable development;
- (ii) The likely effects on the environment of the proposed development; and
- (iii) The likely significant effects of the proposed development on a European site, if carried out.

Any submissions or observations from the Department must be received by An Coimisiún Pleanála no later than 5.30p.m. on 16 December 2026.

8.0 CONCLUSION

This planning application is being lodged with An Coimisiún Pleanála following a determination that the proposed development constitutes a SID. Government policy recognises that onshore wind energy, as a proven and cost effective technology in the context of Ireland's abundant wind resource, will continue to be the major contributor to Ireland's renewable electricity generation to 2030 and the generation of electricity from the proposed development will make a substantial contribution to the reduction of fossil fuel generated electricity and the abatement of greenhouse gas emissions.

The EIAR and NIS submitted with this planning application provide a comprehensive assessment of the likelihood of significant adverse environmental effects arising as a result of the proposed development individually and in combination with other existing, permitted and proposed developments. Overall, it is assessed that any likely adverse environmental effects resulting from the proposed development can be managed and mitigated and that there are lasting social and environmental benefits

as a result of the proposed development.

We trust that the documentation provided is in order and is sufficient for your consideration of this proposed development. Should you have any queries in relation to any of the information enclosed, please do not hesitate to contact this office.

Dear Sir/Madam,

Re: Planning Application for a wind energy development and all associated works at Largan, Boleysillagh, Cloonmeen, Toobrack, and Tullaghanrock, County Roscommon.

1.0 INTRODUCTION

On behalf of our client, Islandmore Wind Farm Limited ('the Applicant'), please find below notification of a Strategic Infrastructure Development (SID) planning application for the abovementioned proposed development in accordance with Section 37E of the *Planning & Development Act 2000 (as amended)* ('the 2000 Act').

2.0 PRE-APPLICATION CONSULTATION

The Applicant entered into pre-application consultations with An Coimisiún Pleanála (Reference ABP-321711-25), pursuant to Section 37B of the 2000 Act. On 09 April 2026, An Coimisiún Pleanála served notice of its determination that the proposed development constitutes SID and that a planning application for same must be made directly to it.

3.0 DESCRIPTION OF THE PROPOSED DEVELOPMENT

The planning application seeks a 10-year planning permission for a proposed development generally described as follows:-

- 3 no. wind turbines with a hub height of 104 metres, a rotor diameter of 162 metres and an overall tip height of 185 metres;
- 7 no. wind turbines with a hub height of 82 metres, a rotor diameter of 136 metres and an overall tip height of 150 metres;
- All associated turbine foundations and crane hardstanding areas;
- All associated underground electrical and communications cabling;
- Construction of approximately 4 kilometres of wind farm access tracks;
- Construction of 6 no. site entrances and upgrade of 1 no. existing site entrance;
- 2 no. temporary construction compounds;
- 1 no. borrow pit which, when exhausted, will be utilised to permanently store excess excavated material;

- The storage, as required, of excavated material at dedicated spoil deposition areas;
- Felling of approximately 6.5 hectares of commercial forestry plantation to facilitate the construction and operation of wind farm infrastructure;
- All associated and ancillary site development, excavation, construction, landscaping and reinstatement works, permanent and temporary works to public roads along the turbine component haul route, the provision of site drainage infrastructure and environmental mitigation measures; and,
- A 40-year operational life from the date of commissioning of the entire proposed development.

4.0 ENVIRONMENTAL IMPACT ASSESSMENT

An Environmental Impact Assessment Report (EIAR) has been submitted with this planning application to inform the Environmental Impact Assessment (EIA) to be carried out by An Coimisiún Pleanála.

The EIAR is presented as 2 no. volumes, which should be read in conjunction with each other, as follows:-

- **Volume I** comprises the main EIAR text and follows a 'Grouped Format' structure where each environmental factor is assessed and presented as a separate chapter. The EIA Directive prescribes the range of environmental factors which should be used to organise descriptions of the environment and likely environmental effects. These have been supplemented with additional environmental factors owing to the characteristics of the proposed development under assessment, as follows:-
 - Chapter 1: Introduction;
 - Chapter 2: Assessment of Project Alternatives;
 - Chapter 3: Description of the Project;
 - Chapter 4: Population & Human Health;
 - Chapter 5: Biodiversity;
 - Chapter 6: Land & Soils;
 - Chapter 7: Water;
 - Chapter 8: Air Quality
 - Chapter 9: Climate;
 - Chapter 10: Landscape;
 - Chapter 11: Cultural Heritage;
 - Chapter 12: Noise & Vibration;
 - Chapter 13: Shadow Flicker;
 - Chapter 14: Material Assets; and,
 - Chapter 15: Interactions of the Foregoing.
- **Volume II** comprises a range of annexes, including technical data and reports, which informed the impact assessment provided in **Volume I** so as to

ensure the EIAR is transparently supported by evidence. All environmental mitigation measures, as prescribed within the EIAR, have also been compiled into a standalone document and submitted at **Volume II**.

A **Non-Technical Summary** of the EIAR is also provided as a separate standalone volume in order to facilitate the wider public concerned in their involvement in the statutory consultation during the planning application determination stage.

Please note that, in accordance with best practice, some minor, sensitive information has been redacted in the EIAR. This information can be provided upon request.

5.0 APPROPRIATE ASSESSMENT

Following the completion of a Stage 1 Appropriate Assessment Screening, a full NIS (Stage 2) has been prepared and submitted with this planning application. The NIS is presented as a separate, standalone document and submitted to inform a Habitats Directive Appropriate Assessment to be carried out by An Coimisiún Pleanála pursuant to Council Directive 92/43/EEC and Bird Directive 2009/147/EC. The NIS addresses the entirety of the project, including relevant cumulative, off-site, and secondary developments.

The NIS concludes; in light of best scientific knowledge; that there is reasonable scientific certainty that there will be no significant effects from the proposed development, either individually or in combination with other plans or projects, adversely affecting the conservation interests or conservation objectives of any Natura 2000 sites. It is therefore concluded that proposed development will not, beyond reasonable scientific doubt, adversely affect the integrity of any Natura 2000 site either directly or indirectly.

6.0 PLANNING APPLICATION DOCUMENTATION

This planning application is being made directly to An Coimisiún Pleanála under the provisions of Section 37E of the 2000 Act. An Coimisiún Pleanála has instructed the Applicant to notify the Department of Enterprise, Tourism and Employment, as a prescribed body, of the lodgement of the planning application and to furnish you with a copy (or copies) of the planning application documentation.

All planning application and associated documentation is available to view at the dedicated project website; www.islandmorewindfarmsid.ie; which includes:-

- Planning Application Notification Letters to An Coimisiún Pleanála and Roscommon County Council;
- Planning Application Form;
- Site Notice;
- Newspaper Notices (2 no.);
- Letters of Landowner Consent;
- Statutory Undertaker Letter;
- Environmental Impact Assessment Portal Confirmation Notice;
- Planning Application Notification Letter issued to each prescribed body;
- Planning Application Drawings (see Schedule of Drawings attached to the Planning Application Form);

- Environmental Impact Assessment Report, including:
 - Volume I – Assessment of the Project;
 - Volume II – Technical Annexes in support of Volume I;
 - Non-Technical Summary; and
- Natura Impact Statement.

7.0 PLANNING APPLICATION PROCEDURE

You are advised that An Coimisiún Pleanála may, in respect of an application for permission, decide to:-

- (a) (i) grant the permission/approval; or
- (ii) make such modifications to the proposed development as it specifies in its decision and grant permission/approval in respect of the proposed development as so modified; or
- (iii) grant permission/approval in respect of part of the proposed development (with or without specified modifications of the foregoing kind), and any of the above decisions may be subject to or without conditions; or
- (b) Refuse to grant the permission/approval.

Submissions or observations may be made only to An Coimisiún Pleanála, 64 Marlborough Street, Dublin 1; or via the An Coimisiún Pleanála website www.pleanala.ie/en-ie/observations; relating to:-

- (i) The implications of the proposed development for proper planning and sustainable development;
- (ii) The likely effects on the environment of the proposed development; and
- (iii) The likely significant effects of the proposed development on a European site, if carried out.

Any submissions or observations from the Department must be received by An Coimisiún Pleanála no later than 5.30p.m. on 16 December 2026.

8.0 CONCLUSION

This planning application is being lodged with An Coimisiún Pleanála following a determination that the proposed development constitutes a SID. Government policy recognises that onshore wind energy, as a proven and cost effective technology in the context of Ireland's abundant wind resource, will continue to be the major contributor to Ireland's renewable electricity generation to 2030 and the generation of electricity from the proposed development will make a substantial contribution to the reduction of fossil fuel generated electricity and the abatement of greenhouse gas emissions.

The EIAR and NIS submitted with this planning application provide a comprehensive assessment of the likelihood of significant adverse environmental effects arising as a result of the proposed development individually and in combination with other existing, permitted and proposed developments. Overall, it is assessed that any likely adverse environmental effects resulting from the proposed development can be managed and mitigated and that there are lasting social and environmental benefits

as a result of the proposed development.

We trust that the documentation provided is in order and is sufficient for your consideration of this proposed development. Should you have any queries in relation to any of the information enclosed, please do not hesitate to contact this office.

- A 40-year operational life from the date of commissioning of the entire proposed development.

4.0 ENVIRONMENTAL IMPACT ASSESSMENT

An Environmental Impact Assessment Report (EIAR) has been submitted with this planning application to inform the Environmental Impact Assessment (EIA) to be carried out by An Coimisiún Pleanála.

The EIAR is presented as 2 no. volumes, which should be read in conjunction with each other, as follows:-

- **Volume I** comprises the main EIAR text and follows a 'Grouped Format' structure where each environmental factor is assessed and presented as a separate chapter. The EIA Directive prescribes the range of environmental factors which should be used to organise descriptions of the environment and likely environmental effects. These have been supplemented with additional environmental factors owing to the characteristics of the proposed development under assessment, as follows:-
 - Chapter 1: Introduction;
 - Chapter 2: Assessment of Project Alternatives;
 - Chapter 3: Description of the Project;
 - Chapter 4: Population & Human Health;
 - Chapter 5: Biodiversity;
 - Chapter 6: Land & Soils;
 - Chapter 7: Water;
 - Chapter 8: Air Quality
 - Chapter 9: Climate;
 - Chapter 10: Landscape;
 - Chapter 11: Cultural Heritage;
 - Chapter 12: Noise & Vibration;
 - Chapter 13: Shadow Flicker;
 - Chapter 14: Material Assets; and,

- Chapter 15: Interactions of the Foregoing.
- **Volume II** comprises a range of annexes, including technical data and reports, which informed the impact assessment provided in **Volume I** so as to ensure the EIAR is transparently supported by evidence. All environmental mitigation measures, as prescribed within the EIAR, have also been compiled into a standalone document and submitted at **Volume II**.

A **Non-Technical Summary** of the EIAR is also provided as a separate standalone volume in order to facilitate the wider public concerned in their involvement in the statutory consultation during the planning application determination stage.

Please note that, in accordance with best practice, some minor, sensitive information has been redacted in the EIAR. This information can be provided upon request.

5.0 APPROPRIATE ASSESSMENT

Following the completion of a Stage 1 Appropriate Assessment Screening, a full NIS (Stage 2) has been prepared and submitted with this planning application. The NIS is presented as a separate, standalone document and submitted to inform a Habitats Directive Appropriate Assessment to be carried out by An Coimisiún Pleanála pursuant to Council Directive 92/43/EEC and Bird Directive 2009/147/EC. The NIS addresses the entirety of the project, including relevant cumulative, off-site, and secondary developments.

The NIS concludes; in light of best scientific knowledge; that there is reasonable scientific certainty that there will be no significant effects from the proposed development, either individually or in combination with other plans or projects, adversely affecting the conservation interests or conservation objectives of any Natura 2000 sites. It is therefore concluded that proposed development will not, beyond reasonable scientific doubt, adversely affect the integrity of any Natura 2000 site either directly or indirectly.

6.0 PLANNING APPLICATION DOCUMENTATION

This planning application is being made directly to An Coimisiún Pleanála under the provisions of Section 37E of the 2000 Act. An Coimisiún Pleanála has instructed the Applicant to notify the Department of Housing, Local Government & Heritage, as a prescribed body, of the lodgement of the planning application and to furnish you with a copy (or copies) of the planning application documentation.

All planning application and associated documentation is available to view at the dedicated project website; www.islandmorewindfarmsid.ie; which includes:-

- Planning Application Notification Letters to An Coimisiún Pleanála and Roscommon County Council;
- Completed Planning Application Form;
- Site Notice;
- Copy of each Newspaper Notice (2 no.);
- EIA Portal Confirmation Notice;
- Planning Application Notification Letter issued to each prescribed body;
- Planning Application Drawings (see Schedule of Drawings attached to the

- Planning Application Form);
- Environmental Impact Assessment Report, including:
 - Volume I – Assessment of the Project;
 - Volume II – Technical Annexes in support of Volume I;
 - Non-Technical Summary; and
 - Natura Impact Statement.

7.0 PLANNING APPLICATION PROCEDURE

You are advised that An Coimisiún Pleanála may, in respect of an application for permission, decide to:-

- (a) (i) grant the permission/approval; or
- (ii) make such modifications to the proposed development as it specifies in its decision and grant permission/approval in respect of the proposed development as so modified; or
- (iii) grant permission/approval in respect of part of the proposed development (with or without specified modifications of the foregoing kind), and any of the above decisions may be subject to or without conditions; or
- (b) Refuse to grant the permission/approval.

Submissions or observations may be made only to An Coimisiún Pleanála, 64 Marlborough Street, Dublin 1; or via the An Coimisiún Pleanála website www.pleanala.ie/en-ie/observations; relating to:-

- (i) The implications of the proposed development for proper planning and sustainable development;
- (ii) The likely effects on the environment of the proposed development; and
- (iii) The likely significant effects of the proposed development on a European site, if carried out.

Any submissions or observations from the Department of Housing, Local Government & Heritage must be received by An Coimisiún Pleanála no later than 5.30p.m. on 16 December 2026.

8.0 CONCLUSION

This planning application is being lodged with An Coimisiún Pleanála following a determination that the proposed development constitutes a SID. Government policy recognises that onshore wind energy, as a proven and cost effective technology in the context of Ireland's abundant wind resource, will continue to be the major contributor to Ireland's renewable electricity generation to 2030 and the generation of electricity from the proposed development will make a substantial contribution to the reduction of fossil fuel generated electricity and the abatement of greenhouse gas emissions.

The EIAR and NIS submitted with this planning application provide a comprehensive assessment of the likelihood of significant adverse environmental effects arising as a result of the proposed development individually and in combination with other existing, permitted and proposed developments. Overall, it is assessed that any likely

adverse environmental effects resulting from the proposed development can be managed and mitigated and that there are lasting social and environmental benefits as a result of the proposed development.

We trust that the documentation provided is in order and is sufficient for your consideration of this proposed development. Should you have any queries in relation to any of the information enclosed, please do not hesitate to contact this office.

Dear Sir/Madam,

Re: Planning Application for a wind energy development and all associated works at Largan, Boleysillagh, Cloonmeen, Toobrack, and Tullaghanrock, County Roscommon.

1.0 INTRODUCTION

On behalf of our client, Islandmore Wind Farm Limited ('the Applicant'), please find below notification of a Strategic Infrastructure Development (SID) planning application for the abovementioned proposed development in accordance with Section 37E of the *Planning & Development Act 2000 (as amended)* ('the 2000 Act').

2.0 PRE-APPLICATION CONSULTATION

The Applicant entered into pre-application consultations with An Coimisiún Pleanála (Reference ABP-321711-25), pursuant to Section 37B of the 2000 Act. On 09 April 2026, An Coimisiún Pleanála served notice of its determination that the proposed development constitutes SID and that a planning application for same must be made directly to it.

3.0 DESCRIPTION OF THE PROPOSED DEVELOPMENT

The planning application seeks a 10-year planning permission for a proposed development generally described as follows:-

- 3 no. wind turbines with a hub height of 104 metres, a rotor diameter of 162 metres and an overall tip height of 185 metres;
- 7 no. wind turbines with a hub height of 82 metres, a rotor diameter of 136 metres and an overall tip height of 150 metres;
- All associated turbine foundations and crane hardstanding areas;
- All associated underground electrical and communications cabling;
- Construction of approximately 4 kilometres of wind farm access tracks;
- Construction of 6 no. site entrances and upgrade of 1 no. existing site entrance;
- 2 no. temporary construction compounds;
- 1 no. borrow pit which, when exhausted, will be utilised to permanently store excess excavated material;

- The storage, as required, of excavated material at dedicated spoil deposition areas;
- Felling of approximately 6.5 hectares of commercial forestry plantation to facilitate the construction and operation of wind farm infrastructure;
- All associated and ancillary site development, excavation, construction, landscaping and reinstatement works, permanent and temporary works to public roads along the turbine component haul route, the provision of site drainage infrastructure and environmental mitigation measures; and,
- A 40-year operational life from the date of commissioning of the entire proposed development.

4.0 ENVIRONMENTAL IMPACT ASSESSMENT

An Environmental Impact Assessment Report (EIAR) has been submitted with this planning application to inform the Environmental Impact Assessment (EIA) to be carried out by An Coimisiún Pleanála.

The EIAR is presented as 2 no. volumes, which should be read in conjunction with each other, as follows:-

- **Volume I** comprises the main EIAR text and follows a 'Grouped Format' structure where each environmental factor is assessed and presented as a separate chapter. The EIA Directive prescribes the range of environmental factors which should be used to organise descriptions of the environment and likely environmental effects. These have been supplemented with additional environmental factors owing to the characteristics of the proposed development under assessment, as follows:-
 - Chapter 1: Introduction;
 - Chapter 2: Assessment of Project Alternatives;
 - Chapter 3: Description of the Project;
 - Chapter 4: Population & Human Health;
 - Chapter 5: Biodiversity;
 - Chapter 6: Land & Soils;
 - Chapter 7: Water;
 - Chapter 8: Air Quality
 - Chapter 9: Climate;
 - Chapter 10: Landscape;
 - Chapter 11: Cultural Heritage;
 - Chapter 12: Noise & Vibration;
 - Chapter 13: Shadow Flicker;
 - Chapter 14: Material Assets; and,
 - Chapter 15: Interactions of the Foregoing.
- **Volume II** comprises a range of annexes, including technical data and reports, which informed the impact assessment provided in **Volume I** so as to

ensure the EIAR is transparently supported by evidence. All environmental mitigation measures, as prescribed within the EIAR, have also been compiled into a standalone document and submitted at **Volume II**.

A **Non-Technical Summary** of the EIAR is also provided as a separate standalone volume in order to facilitate the wider public concerned in their involvement in the statutory consultation during the planning application determination stage.

Please note that, in accordance with best practice, some minor, sensitive information has been redacted in the EIAR. This information can be provided upon request.

5.0 APPROPRIATE ASSESSMENT

Following the completion of a Stage 1 Appropriate Assessment Screening, a full NIS (Stage 2) has been prepared and submitted with this planning application. The NIS is presented as a separate, standalone document and submitted to inform a Habitats Directive Appropriate Assessment to be carried out by An Coimisiún Pleanála pursuant to Council Directive 92/43/EEC and Bird Directive 2009/147/EC. The NIS addresses the entirety of the project, including relevant cumulative, off-site, and secondary developments.

The NIS concludes; in light of best scientific knowledge; that there is reasonable scientific certainty that there will be no significant effects from the proposed development, either individually or in combination with other plans or projects, adversely affecting the conservation interests or conservation objectives of any Natura 2000 sites. It is therefore concluded that proposed development will not, beyond reasonable scientific doubt, adversely affect the integrity of any Natura 2000 site either directly or indirectly.

6.0 PLANNING APPLICATION DOCUMENTATION

This planning application is being made directly to An Coimisiún Pleanála under the provisions of Section 37E of the 2000 Act. An Coimisiún Pleanála has instructed the Applicant to notify the Department of Rural and Community Development and the Gaeltacht, as a prescribed body, of the lodgement of the planning application and to furnish you with a copy (or copies) of the planning application documentation.

All planning application and associated documentation is available to view at the dedicated project website; www.islandmorewindfarmsid.ie; which includes:-

- Planning Application Notification Letters to An Coimisiún Pleanála and Roscommon County Council;
- Planning Application Form;
- Site Notice;
- Newspaper Notices (2 no.);
- Letters of Landowner Consent;
- Statutory Undertaker Letter;
- Environmental Impact Assessment Portal Confirmation Notice;
- Planning Application Notification Letter issued to each prescribed body;
- Planning Application Drawings (see Schedule of Drawings attached to the Planning Application Form);

- Environmental Impact Assessment Report, including:
 - Volume I – Assessment of the Project;
 - Volume II – Technical Annexes in support of Volume I;
 - Non-Technical Summary; and
- Natura Impact Statement.

7.0 PLANNING APPLICATION PROCEDURE

You are advised that An Coimisiún Pleanála may, in respect of an application for permission, decide to:-

- (a) (i) grant the permission/approval; or
- (ii) make such modifications to the proposed development as it specifies in its decision and grant permission/approval in respect of the proposed development as so modified; or
- (iii) grant permission/approval in respect of part of the proposed development (with or without specified modifications of the foregoing kind), and any of the above decisions may be subject to or without conditions; or
- (b) Refuse to grant the permission/approval.

Submissions or observations may be made only to An Coimisiún Pleanála, 64 Marlborough Street, Dublin 1; or via the An Coimisiún Pleanála website www.pleanala.ie/en-ie/observations; relating to:-

- (i) The implications of the proposed development for proper planning and sustainable development;
- (ii) The likely effects on the environment of the proposed development; and
- (iii) The likely significant effects of the proposed development on a European site, if carried out.

Any submissions or observations from the Department must be received by An Coimisiún Pleanála no later than 5.30p.m. on 16 December 2026.

8.0 CONCLUSION

This planning application is being lodged with An Coimisiún Pleanála following a determination that the proposed development constitutes a SID. Government policy recognises that onshore wind energy, as a proven and cost effective technology in the context of Ireland's abundant wind resource, will continue to be the major contributor to Ireland's renewable electricity generation to 2030 and the generation of electricity from the proposed development will make a substantial contribution to the reduction of fossil fuel generated electricity and the abatement of greenhouse gas emissions.

The EIAR and NIS submitted with this planning application provide a comprehensive assessment of the likelihood of significant adverse environmental effects arising as a result of the proposed development individually and in combination with other existing, permitted and proposed developments. Overall, it is assessed that any likely adverse environmental effects resulting from the proposed development can be managed and mitigated and that there are lasting social and environmental benefits

as a result of the proposed development.

We trust that the documentation provided is in order and is sufficient for your consideration of this proposed development. Should you have any queries in relation to any of the information enclosed, please do not hesitate to contact this office.

Yours sincerely,

Your Ref: --/--

Dear Sir/Madam,

Re: Planning Application for a wind energy development and all associated works at Largan, Boleysillagh, Cloonmeen, Toobrack, and Tullaghanrock, County Roscommon.

1.0 INTRODUCTION

On behalf of our client, Islandmore Wind Farm Limited ('the Applicant'), please find below notification of a Strategic Infrastructure Development (SID) planning application for the abovementioned proposed development in accordance with Section 37E of the *Planning & Development Act 2000 (as amended)* ('the 2000 Act').

2.0 PRE-APPLICATION CONSULTATION

The Applicant entered into pre-application consultations with An Coimisiún Pleanála (Reference ABP-321711-25), pursuant to Section 37B of the 2000 Act. On 09 April 2026, An Coimisiún Pleanála served notice of its determination that the proposed development constitutes SID and that a planning application for same must be made directly to it.

3.0 DESCRIPTION OF THE PROPOSED DEVELOPMENT

The planning application seeks a 10-year planning permission for a proposed development generally described as follows:-

- 3 no. wind turbines with a hub height of 104 metres, a rotor diameter of 162 metres and an overall tip height of 185 metres;
- 7 no. wind turbines with a hub height of 82 metres, a rotor diameter of 136 metres and an overall tip height of 150 metres;
- All associated turbine foundations and crane hardstanding areas;
- All associated underground electrical and communications cabling;
- Construction of approximately 4 kilometres of wind farm access tracks;
- Construction of 6 no. site entrances and upgrade of 1 no. existing site entrance;
- 2 no. temporary construction compounds;
- 1 no. borrow pit which, when exhausted, will be utilised to permanently store excess excavated material;

- The storage, as required, of excavated material at dedicated spoil deposition areas;
- Felling of approximately 6.5 hectares of commercial forestry plantation to facilitate the construction and operation of wind farm infrastructure;
- All associated and ancillary site development, excavation, construction, landscaping and reinstatement works, permanent and temporary works to public roads along the turbine component haul route, the provision of site drainage infrastructure and environmental mitigation measures; and,
- A 40-year operational life from the date of commissioning of the entire proposed development.

4.0 ENVIRONMENTAL IMPACT ASSESSMENT

An Environmental Impact Assessment Report (EIAR) has been submitted with this planning application to inform the Environmental Impact Assessment (EIA) to be carried out by An Coimisiún Pleanála.

The EIAR is presented as 2 no. volumes, which should be read in conjunction with each other, as follows:-

- **Volume I** comprises the main EIAR text and follows a 'Grouped Format' structure where each environmental factor is assessed and presented as a separate chapter. The EIA Directive prescribes the range of environmental factors which should be used to organise descriptions of the environment and likely environmental effects. These have been supplemented with additional environmental factors owing to the characteristics of the proposed development under assessment, as follows:-
 - Chapter 1: Introduction;
 - Chapter 2: Assessment of Project Alternatives;
 - Chapter 3: Description of the Project;
 - Chapter 4: Population & Human Health;
 - Chapter 5: Biodiversity;
 - Chapter 6: Land & Soils;
 - Chapter 7: Water;
 - Chapter 8: Air Quality
 - Chapter 9: Climate;
 - Chapter 10: Landscape;
 - Chapter 11: Cultural Heritage;
 - Chapter 12: Noise & Vibration;
 - Chapter 13: Shadow Flicker;
 - Chapter 14: Material Assets; and,
 - Chapter 15: Interactions of the Foregoing.
- **Volume II** comprises a range of annexes, including technical data and reports, which informed the impact assessment provided in **Volume I** so as to

ensure the EIAR is transparently supported by evidence. All environmental mitigation measures, as prescribed within the EIAR, have also been compiled into a standalone document and submitted at **Volume II**.

A **Non-Technical Summary** of the EIAR is also provided as a separate standalone volume in order to facilitate the wider public concerned in their involvement in the statutory consultation during the planning application determination stage.

Please note that, in accordance with best practice, some minor, sensitive information has been redacted in the EIAR. This information can be provided upon request.

5.0 APPROPRIATE ASSESSMENT

Following the completion of a Stage 1 Appropriate Assessment Screening, a full NIS (Stage 2) has been prepared and submitted with this planning application. The NIS is presented as a separate, standalone document and submitted to inform a Habitats Directive Appropriate Assessment to be carried out by An Coimisiún Pleanála pursuant to Council Directive 92/43/EEC and Bird Directive 2009/147/EC. The NIS addresses the entirety of the project, including relevant cumulative, off-site, and secondary developments.

The NIS concludes; in light of best scientific knowledge; that there is reasonable scientific certainty that there will be no significant effects from the proposed development, either individually or in combination with other plans or projects, adversely affecting the conservation interests or conservation objectives of any Natura 2000 sites. It is therefore concluded that proposed development will not, beyond reasonable scientific doubt, adversely affect the integrity of any Natura 2000 site either directly or indirectly.

6.0 PLANNING APPLICATION DOCUMENTATION

This planning application is being made directly to An Coimisiún Pleanála under the provisions of Section 37E of the 2000 Act. An Coimisiún Pleanála has instructed the Applicant to notify Fáilte Ireland, as a prescribed body, of the lodgement of the planning application and to furnish you with a copy (or copies) of the planning application documentation.

All planning application and associated documentation is available to view at the dedicated project website; www.islandmorewindfarmsid.ie; which includes:-

- Planning Application Notification Letters to An Coimisiún Pleanála and Roscommon County Council;
- Planning Application Form;
- Site Notice;
- Newspaper Notices (2 no.);
- Letters of Landowner Consent;
- Statutory Undertaker Letter;
- Environmental Impact Assessment Portal Confirmation Notice;
- Planning Application Notification Letter issued to each prescribed body;
- Planning Application Drawings (see Schedule of Drawings attached to the Planning Application Form);

- Environmental Impact Assessment Report, including:
 - Volume I – Assessment of the Project;
 - Volume II – Technical Annexes in support of Volume I;
 - Non-Technical Summary; and
- Natura Impact Statement.

7.0 PLANNING APPLICATION PROCEDURE

You are advised that An Coimisiún Pleanála may, in respect of an application for permission, decide to:-

- (a) (i) grant the permission/approval; or
- (ii) make such modifications to the proposed development as it specifies in its decision and grant permission/approval in respect of the proposed development as so modified; or
- (iii) grant permission/approval in respect of part of the proposed development (with or without specified modifications of the foregoing kind), and any of the above decisions may be subject to or without conditions; or
- (b) Refuse to grant the permission/approval.

Submissions or observations may be made only to An Coimisiún Pleanála, 64 Marlborough Street, Dublin 1; or via the An Coimisiún Pleanála website www.pleanala.ie/en-ie/observations; relating to:-

- (i) The implications of the proposed development for proper planning and sustainable development;
- (ii) The likely effects on the environment of the proposed development; and
- (iii) The likely significant effects of the proposed development on a European site, if carried out.

Any submissions or observations from Fáilte Ireland must be received by An Coimisiún Pleanála no later than 5.30p.m. on 16 December 2026.

8.0 CONCLUSION

This planning application is being lodged with An Coimisiún Pleanála following a determination that the proposed development constitutes a SID. Government policy recognises that onshore wind energy, as a proven and cost effective technology in the context of Ireland's abundant wind resource, will continue to be the major contributor to Ireland's renewable electricity generation to 2030 and the generation of electricity from the proposed development will make a substantial contribution to the reduction of fossil fuel generated electricity and the abatement of greenhouse gas emissions.

The EIAR and NIS submitted with this planning application provide a comprehensive assessment of the likelihood of significant adverse environmental effects arising as a result of the proposed development individually and in combination with other existing, permitted and proposed developments. Overall, it is assessed that any likely adverse environmental effects resulting from the proposed development can be managed and mitigated and that there are lasting social and environmental benefits

as a result of the proposed development.

We trust that the documentation provided is in order and is sufficient for your consideration of this proposed development. Should you have any queries in relation to any of the information enclosed, please do not hesitate to contact this office.

Dear Sir/Madam,

Re: Planning Application for a wind energy development and all associated works at Largan, Boleysillagh, Cloonmeen, Toobrack, and Tullaghanrock, County Roscommon.

1.0 INTRODUCTION

On behalf of our client, Islandmore Wind Farm Limited ('the Applicant'), please find below notification of a Strategic Infrastructure Development (SID) planning application for the abovementioned proposed development in accordance with Section 37E of the *Planning & Development Act 2000 (as amended)* ('the 2000 Act').

2.0 PRE-APPLICATION CONSULTATION

The Applicant entered into pre-application consultations with An Coimisiún Pleanála ([Reference ABP-321711-25](#)), pursuant to Section 37B of the 2000 Act. On 09 April 2026, An Coimisiún Pleanála served notice of its determination that the proposed development constitutes SID and that a planning application for same must be made directly to it.

3.0 DESCRIPTION OF THE PROPOSED DEVELOPMENT

The planning application seeks a 10-year planning permission for a proposed development generally described as follows:-

- 3 no. wind turbines with a hub height of 104 metres, a rotor diameter of 162 metres and an overall tip height of 185 metres;
- 7 no. wind turbines with a hub height of 82 metres, a rotor diameter of 136 metres and an overall tip height of 150 metres;
- All associated turbine foundations and crane hardstanding areas;
- All associated underground electrical and communications cabling;
- Construction of approximately 4 kilometres of wind farm access tracks;
- Construction of 6 no. site entrances and upgrade of 1 no. existing site entrance;
- 2 no. temporary construction compounds;

- 1 no. borrow pit which, when exhausted, will be utilised to permanently store excess excavated material;
- The storage, as required, of excavated material at dedicated spoil deposition areas;
- Felling of approximately 6.5 hectares of commercial forestry plantation to facilitate the construction and operation of wind farm infrastructure;
- All associated and ancillary site development, excavation, construction, landscaping and reinstatement works, permanent and temporary works to public roads along the turbine component haul route, the provision of site drainage infrastructure and environmental mitigation measures; and,
- A 40-year operational life from the date of commissioning of the entire proposed development.

4.0 ENVIRONMENTAL IMPACT ASSESSMENT

An Environmental Impact Assessment Report (EIAR) has been submitted with this planning application to inform the Environmental Impact Assessment (EIA) to be carried out by An Coimisiún Pleanála.

The EIAR is presented as 2 no. volumes, which should be read in conjunction with each other, as follows:-

- **Volume I** comprises the main EIAR text and follows a 'Grouped Format' structure where each environmental factor is assessed and presented as a separate chapter. The EIA Directive prescribes the range of environmental factors which should be used to organise descriptions of the environment and likely environmental effects. These have been supplemented with additional environmental factors owing to the characteristics of the proposed development under assessment, as follows:-
 - Chapter 1: Introduction;
 - Chapter 2: Assessment of Project Alternatives;
 - Chapter 3: Description of the Project;
 - Chapter 4: Population & Human Health;
 - Chapter 5: Biodiversity;
 - Chapter 6: Land & Soils;
 - Chapter 7: Water;
 - Chapter 8: Air Quality
 - Chapter 9: Climate;
 - Chapter 10: Landscape;
 - Chapter 11: Cultural Heritage;
 - Chapter 12: Noise & Vibration;
 - Chapter 13: Shadow Flicker;
 - Chapter 14: Material Assets; and,
 - Chapter 15: Interactions of the Foregoing.

- **Volume II** comprises a range of annexes, including technical data and reports, which informed the impact assessment provided in **Volume I** so as to ensure the EIAR is transparently supported by evidence. All environmental mitigation measures, as prescribed within the EIAR, have also been compiled into a standalone document and submitted at **Volume II**.

A **Non-Technical Summary** of the EIAR is also provided as a separate standalone volume in order to facilitate the wider public concerned in their involvement in the statutory consultation during the planning application determination stage.

Please note that, in accordance with best practice, some minor, sensitive information has been redacted in the EIAR. This information can be provided upon request.

5.0 APPROPRIATE ASSESSMENT

Following the completion of a Stage 1 Appropriate Assessment Screening, a full NIS (Stage 2) has been prepared and submitted with this planning application. The NIS is presented as a separate, standalone document and submitted to inform a Habitats Directive Appropriate Assessment to be carried out by An Coimisiún Pleanála pursuant to Council Directive 92/43/EEC and Bird Directive 2009/147/EC. The NIS addresses the entirety of the project, including relevant cumulative, off-site, and secondary developments.

The NIS concludes; in light of best scientific knowledge; that there is reasonable scientific certainty that there will be no significant effects from the proposed development, either individually or in combination with other plans or projects, adversely affecting the conservation interests or conservation objectives of any Natura 2000 sites. It is therefore concluded that proposed development will not, beyond reasonable scientific doubt, adversely affect the integrity of any Natura 2000 site either directly or indirectly.

6.0 PLANNING APPLICATION DOCUMENTATION

This planning application is being made directly to An Coimisiún Pleanála under the provisions of Section 37E of the 2000 Act. An Coimisiún Pleanála has instructed the Applicant to notify The Heritage Council, as a prescribed body, of the lodgement of the planning application and to furnish you with a copy (or copies) of the planning application documentation.

All planning application and associated documentation is available to view at the dedicated project website; www.islandmorewindfarmsid.ie; which includes:-

- Planning Application Notification Letters to An Coimisiún Pleanála and Roscommon County Council;
- Planning Application Form;
- Site Notice;
- Newspaper Notices (2 no.);
- Letters of Landowner Consent;
- Statutory Undertaker Letter;
- Environmental Impact Assessment Portal Confirmation Notice;
- Planning Application Notification Letter issued to each prescribed body;

- Planning Application Drawings (see Schedule of Drawings attached to the Planning Application Form);
- Environmental Impact Assessment Report, including:
 - Volume I – Assessment of the Project;
 - Volume II – Technical Annexes in support of Volume I;
 - Non-Technical Summary; and
- Natura Impact Statement.

7.0 PLANNING APPLICATION PROCEDURE

You are advised that An Coimisiún Pleanála may, in respect of an application for permission, decide to:-

- (a) (i) grant the permission/approval; or
- (ii) make such modifications to the proposed development as it specifies in its decision and grant permission/approval in respect of the proposed development as so modified; or
- (iii) grant permission/approval in respect of part of the proposed development (with or without specified modifications of the foregoing kind), and any of the above decisions may be subject to or without conditions; or
- (b) Refuse to grant the permission/approval.

Submissions or observations may be made only to An Coimisiún Pleanála, 64 Marlborough Street, Dublin 1; or via the An Coimisiún Pleanála website www.pleanala.ie/en-ie/observations; relating to:-

- (i) The implications of the proposed development for proper planning and sustainable development;
- (ii) The likely effects on the environment of the proposed development; and
- (iii) The likely significant effects of the proposed development on a European site, if carried out.

Any submissions or observations from The Heritage Council must be received by An Coimisiún Pleanála no later than 5.30p.m. on 16 December 2026.

8.0 CONCLUSION

This planning application is being lodged with An Coimisiún Pleanála following a determination that the proposed development constitutes a SID. Government policy recognises that onshore wind energy, as a proven and cost effective technology in the context of Ireland's abundant wind resource, will continue to be the major contributor to Ireland's renewable electricity generation to 2030 and the generation of electricity from the proposed development will make a substantial contribution to the reduction of fossil fuel generated electricity and the abatement of greenhouse gas emissions.

The EIAR and NIS submitted with this planning application provide a comprehensive assessment of the likelihood of significant adverse environmental effects arising as a result of the proposed development individually and in combination with other existing, permitted and proposed developments. Overall, it is assessed that any likely

adverse environmental effects resulting from the proposed development can be managed and mitigated and that there are lasting social and environmental benefits as a result of the proposed development.

We trust that the documentation provided is in order and is sufficient for your consideration of this proposed development. Should you have any queries in relation to any of the information enclosed, please do not hesitate to contact this office.

Dear Sir/Madam,

Re: Planning Application for a wind energy development and all associated works at Largan, Boleysillagh, Cloonmeen, Toobrack, and Tullaghanrock, County Roscommon.

1.0 INTRODUCTION

On behalf of our client, Islandmore Wind Farm Limited ('the Applicant'), please find below notification of a Strategic Infrastructure Development (SID) planning application for the abovementioned proposed development in accordance with Section 37E of the *Planning & Development Act 2000 (as amended)* ('the 2000 Act').

2.0 PRE-APPLICATION CONSULTATION

The Applicant entered into pre-application consultations with An Coimisiún Pleanála (Reference ABP-321711-25), pursuant to Section 37B of the 2000 Act. On 09 April 2026, An Coimisiún Pleanála served notice of its determination that the proposed development constitutes SID and that a planning application for same must be made directly to it.

3.0 DESCRIPTION OF THE PROPOSED DEVELOPMENT

The planning application seeks a 10-year planning permission for a proposed development generally described as follows:-

- 3 no. wind turbines with a hub height of 104 metres, a rotor diameter of 162 metres and an overall tip height of 185 metres;
- 7 no. wind turbines with a hub height of 82 metres, a rotor diameter of 136 metres and an overall tip height of 150 metres;
- All associated turbine foundations and crane hardstanding areas;
- All associated underground electrical and communications cabling;
- Construction of approximately 4 kilometres of wind farm access tracks;
- Construction of 6 no. site entrances and upgrade of 1 no. existing site entrance;
- 2 no. temporary construction compounds;
- 1 no. borrow pit which, when exhausted, will be utilised to permanently store excess excavated material;

- The storage, as required, of excavated material at dedicated spoil deposition areas;
- Felling of approximately 6.5 hectares of commercial forestry plantation to facilitate the construction and operation of wind farm infrastructure;
- All associated and ancillary site development, excavation, construction, landscaping and reinstatement works, permanent and temporary works to public roads along the turbine component haul route, the provision of site drainage infrastructure and environmental mitigation measures; and,
- A 40-year operational life from the date of commissioning of the entire proposed development.

4.0 ENVIRONMENTAL IMPACT ASSESSMENT

An Environmental Impact Assessment Report (EIAR) has been submitted with this planning application to inform the Environmental Impact Assessment (EIA) to be carried out by An Coimisiún Pleanála.

The EIAR is presented as 2 no. volumes, which should be read in conjunction with each other, as follows:-

- **Volume I** comprises the main EIAR text and follows a 'Grouped Format' structure where each environmental factor is assessed and presented as a separate chapter. The EIA Directive prescribes the range of environmental factors which should be used to organise descriptions of the environment and likely environmental effects. These have been supplemented with additional environmental factors owing to the characteristics of the proposed development under assessment, as follows:-
 - Chapter 1: Introduction;
 - Chapter 2: Assessment of Project Alternatives;
 - Chapter 3: Description of the Project;
 - Chapter 4: Population & Human Health;
 - Chapter 5: Biodiversity;
 - Chapter 6: Land & Soils;
 - Chapter 7: Water;
 - Chapter 8: Air Quality
 - Chapter 9: Climate;
 - Chapter 10: Landscape;
 - Chapter 11: Cultural Heritage;
 - Chapter 12: Noise & Vibration;
 - Chapter 13: Shadow Flicker;
 - Chapter 14: Material Assets; and,
 - Chapter 15: Interactions of the Foregoing.
- **Volume II** comprises a range of annexes, including technical data and reports, which informed the impact assessment provided in **Volume I** so as to

ensure the EIAR is transparently supported by evidence. All environmental mitigation measures, as prescribed within the EIAR, have also been compiled into a standalone document and submitted at **Volume II**.

A **Non-Technical Summary** of the EIAR is also provided as a separate standalone volume in order to facilitate the wider public concerned in their involvement in the statutory consultation during the planning application determination stage.

Please note that, in accordance with best practice, some minor, sensitive information has been redacted in the EIAR. This information can be provided upon request.

5.0 APPROPRIATE ASSESSMENT

Following the completion of a Stage 1 Appropriate Assessment Screening, a full NIS (Stage 2) has been prepared and submitted with this planning application. The NIS is presented as a separate, standalone document and submitted to inform a Habitats Directive Appropriate Assessment to be carried out by An Coimisiún Pleanála pursuant to Council Directive 92/43/EEC and Bird Directive 2009/147/EC. The NIS addresses the entirety of the project, including relevant cumulative, off-site, and secondary developments.

The NIS concludes; in light of best scientific knowledge; that there is reasonable scientific certainty that there will be no significant effects from the proposed development, either individually or in combination with other plans or projects, adversely affecting the conservation interests or conservation objectives of any Natura 2000 sites. It is therefore concluded that proposed development will not, beyond reasonable scientific doubt, adversely affect the integrity of any Natura 2000 site either directly or indirectly.

6.0 PLANNING APPLICATION DOCUMENTATION

This planning application is being made directly to An Coimisiún Pleanála under the provisions of Section 37E of the 2000 Act. An Coimisiún Pleanála has instructed the Applicant to notify the Health Service Executive, as a prescribed body, of the lodgement of the planning application and to furnish you with a copy (or copies) of the planning application documentation.

All planning application and associated documentation is available to view at the dedicated project website; www.islandmorewindfarmsid.ie; which includes:-

- Planning Application Notification Letters to An Coimisiún Pleanála and Roscommon County Council;
- Planning Application Form;
- Site Notice;
- Newspaper Notices (2 no.);
- Letters of Landowner Consent;
- Statutory Undertaker Letter;
- Environmental Impact Assessment Portal Confirmation Notice;
- Planning Application Notification Letter issued to each prescribed body;
- Planning Application Drawings (see Schedule of Drawings attached to the Planning Application Form);

- Environmental Impact Assessment Report, including:
 - Volume I – Assessment of the Project;
 - Volume II – Technical Annexes in support of Volume I;
 - Non-Technical Summary; and
- Natura Impact Statement.

7.0 PLANNING APPLICATION PROCEDURE

You are advised that An Coimisiún Pleanála may, in respect of an application for permission, decide to:-

- (a) (i) grant the permission/approval; or
- (ii) make such modifications to the proposed development as it specifies in its decision and grant permission/approval in respect of the proposed development as so modified; or
- (iii) grant permission/approval in respect of part of the proposed development (with or without specified modifications of the foregoing kind), and any of the above decisions may be subject to or without conditions; or
- (b) Refuse to grant the permission/approval.

Submissions or observations may be made only to An Coimisiún Pleanála, 64 Marlborough Street, Dublin 1; or via the An Coimisiún Pleanála website www.pleanala.ie/en-ie/observations; relating to:-

- (i) The implications of the proposed development for proper planning and sustainable development;
- (ii) The likely effects on the environment of the proposed development; and
- (iii) The likely significant effects of the proposed development on a European site, if carried out.

Any submissions or observations from the Health Service Executive must be received by An Coimisiún Pleanála no later than 5.30p.m. on 16 December 2026.

8.0 CONCLUSION

This planning application is being lodged with An Coimisiún Pleanála following a determination that the proposed development constitutes a SID. Government policy recognises that onshore wind energy, as a proven and cost effective technology in the context of Ireland's abundant wind resource, will continue to be the major contributor to Ireland's renewable electricity generation to 2030 and the generation of electricity from the proposed development will make a substantial contribution to the reduction of fossil fuel generated electricity and the abatement of greenhouse gas emissions.

The EIAR and NIS submitted with this planning application provide a comprehensive assessment of the likelihood of significant adverse environmental effects arising as a result of the proposed development individually and in combination with other existing, permitted and proposed developments. Overall, it is assessed that any likely adverse environmental effects resulting from the proposed development can be managed and mitigated and that there are lasting social and environmental benefits

as a result of the proposed development.

We trust that the documentation provided is in order and is sufficient for your consideration of this proposed development. Should you have any queries in relation to any of the information enclosed, please do not hesitate to contact this office.

Yours sincerely,

Dear Sir/Madam,

Re: Planning Application for a wind energy development and all associated works at Largan, Boleysillagh, Cloonmeen, Toobrack, and Tullaghanrock, County Roscommon.

1.0 INTRODUCTION

On behalf of our client, Islandmore Wind Farm Limited ('the Applicant'), please find below notification of a Strategic Infrastructure Development (SID) planning application for the abovementioned proposed development in accordance with Section 37E of the *Planning & Development Act 2000 (as amended)* ('the 2000 Act').

2.0 PRE-APPLICATION CONSULTATION

The Applicant entered into pre-application consultations with An Coimisiún Pleanála (Reference ABP-321711-25), pursuant to Section 37B of the 2000 Act. On 09 April 2026, An Coimisiún Pleanála served notice of its determination that the proposed development constitutes SID and that a planning application for same must be made directly to it.

3.0 DESCRIPTION OF THE PROPOSED DEVELOPMENT

The planning application seeks a 10-year planning permission for a proposed development generally described as follows:-

- 3 no. wind turbines with a hub height of 104 metres, a rotor diameter of 162 metres and an overall tip height of 185 metres;
- 7 no. wind turbines with a hub height of 82 metres, a rotor diameter of 136 metres and an overall tip height of 150 metres;
- All associated turbine foundations and crane hardstanding areas;
- All associated underground electrical and communications cabling;
- Construction of approximately 4 kilometres of wind farm access tracks;
- Construction of 6 no. site entrances and upgrade of 1 no. existing site entrance;
- 2 no. temporary construction compounds;
- 1 no. borrow pit which, when exhausted, will be utilised to permanently store excess excavated material;

- The storage, as required, of excavated material at dedicated spoil deposition areas;
- Felling of approximately 6.5 hectares of commercial forestry plantation to facilitate the construction and operation of wind farm infrastructure;
- All associated and ancillary site development, excavation, construction, landscaping and reinstatement works, permanent and temporary works to public roads along the turbine component haul route, the provision of site drainage infrastructure and environmental mitigation measures; and,
- A 40-year operational life from the date of commissioning of the entire proposed development.

4.0 ENVIRONMENTAL IMPACT ASSESSMENT

An Environmental Impact Assessment Report (EIAR) has been submitted with this planning application to inform the Environmental Impact Assessment (EIA) to be carried out by An Coimisiún Pleanála.

The EIAR is presented as 2 no. volumes, which should be read in conjunction with each other, as follows:-

- **Volume I** comprises the main EIAR text and follows a 'Grouped Format' structure where each environmental factor is assessed and presented as a separate chapter. The EIA Directive prescribes the range of environmental factors which should be used to organise descriptions of the environment and likely environmental effects. These have been supplemented with additional environmental factors owing to the characteristics of the proposed development under assessment, as follows:-
 - Chapter 1: Introduction;
 - Chapter 2: Assessment of Project Alternatives;
 - Chapter 3: Description of the Project;
 - Chapter 4: Population & Human Health;
 - Chapter 5: Biodiversity;
 - Chapter 6: Land & Soils;
 - Chapter 7: Water;
 - Chapter 8: Air Quality
 - Chapter 9: Climate;
 - Chapter 10: Landscape;
 - Chapter 11: Cultural Heritage;
 - Chapter 12: Noise & Vibration;
 - Chapter 13: Shadow Flicker;
 - Chapter 14: Material Assets; and,
 - Chapter 15: Interactions of the Foregoing.
- **Volume II** comprises a range of annexes, including technical data and reports, which informed the impact assessment provided in **Volume I** so as to

ensure the EIAR is transparently supported by evidence. All environmental mitigation measures, as prescribed within the EIAR, have also been compiled into a standalone document and submitted at **Volume II**.

A **Non-Technical Summary** of the EIAR is also provided as a separate standalone volume in order to facilitate the wider public concerned in their involvement in the statutory consultation during the planning application determination stage.

Please note that, in accordance with best practice, some minor, sensitive information has been redacted in the EIAR. This information can be provided upon request.

5.0 APPROPRIATE ASSESSMENT

Following the completion of a Stage 1 Appropriate Assessment Screening, a full NIS (Stage 2) has been prepared and submitted with this planning application. The NIS is presented as a separate, standalone document and submitted to inform a Habitats Directive Appropriate Assessment to be carried out by An Coimisiún Pleanála pursuant to Council Directive 92/43/EEC and Bird Directive 2009/147/EC. The NIS addresses the entirety of the project, including relevant cumulative, off-site, and secondary developments.

The NIS concludes; in light of best scientific knowledge; that there is reasonable scientific certainty that there will be no significant effects from the proposed development, either individually or in combination with other plans or projects, adversely affecting the conservation interests or conservation objectives of any Natura 2000 sites. It is therefore concluded that proposed development will not, beyond reasonable scientific doubt, adversely affect the integrity of any Natura 2000 site either directly or indirectly.

6.0 PLANNING APPLICATION DOCUMENTATION

This planning application is being made directly to An Coimisiún Pleanála under the provisions of Section 37E of the 2000 Act. An Coimisiún Pleanála has instructed the Applicant to notify the Irish Aviation Authority, as a prescribed body, of the lodgement of the planning application and to furnish you with a copy (or copies) of the planning application documentation.

All planning application and associated documentation is available to view at the dedicated project website; www.islandmorewindfarmsid.ie; which includes:-

- Planning Application Notification Letters to An Coimisiún Pleanála and Roscommon County Council;
- Planning Application Form;
- Site Notice;
- Newspaper Notices (2 no.);
- Letters of Landowner Consent;
- Statutory Undertaker Letter;
- Environmental Impact Assessment Portal Confirmation Notice;
- Planning Application Notification Letter issued to each prescribed body;
- Planning Application Drawings (see Schedule of Drawings attached to the Planning Application Form);

- Environmental Impact Assessment Report, including:
 - Volume I – Assessment of the Project;
 - Volume II – Technical Annexes in support of Volume I;
 - Non-Technical Summary; and
- Natura Impact Statement.

7.0 PLANNING APPLICATION PROCEDURE

You are advised that An Coimisiún Pleanála may, in respect of an application for permission, decide to:-

- (a) (i) grant the permission/approval; or
- (ii) make such modifications to the proposed development as it specifies in its decision and grant permission/approval in respect of the proposed development as so modified; or
- (iii) grant permission/approval in respect of part of the proposed development (with or without specified modifications of the foregoing kind), and any of the above decisions may be subject to or without conditions; or
- (b) Refuse to grant the permission/approval.

Submissions or observations may be made only to An Coimisiún Pleanála, 64 Marlborough Street, Dublin 1; or via the An Coimisiún Pleanála website www.pleanala.ie/en-ie/observations; relating to:-

- (i) The implications of the proposed development for proper planning and sustainable development;
- (ii) The likely effects on the environment of the proposed development; and
- (iii) The likely significant effects of the proposed development on a European site, if carried out.

Any submissions or observations from the Irish Aviation Authority must be received by An Coimisiún Pleanála no later than 5.30p.m. on 16 December 2026.

8.0 CONCLUSION

This planning application is being lodged with An Coimisiún Pleanála following a determination that the proposed development constitutes a SID. Government policy recognises that onshore wind energy, as a proven and cost effective technology in the context of Ireland's abundant wind resource, will continue to be the major contributor to Ireland's renewable electricity generation to 2030 and the generation of electricity from the proposed development will make a substantial contribution to the reduction of fossil fuel generated electricity and the abatement of greenhouse gas emissions.

The EIAR and NIS submitted with this planning application provide a comprehensive assessment of the likelihood of significant adverse environmental effects arising as a result of the proposed development individually and in combination with other existing, permitted and proposed developments. Overall, it is assessed that any likely adverse environmental effects resulting from the proposed development can be managed and mitigated and that there are lasting social and environmental benefits

as a result of the proposed development.

We trust that the documentation provided is in order and is sufficient for your consideration of this proposed development. Should you have any queries in relation to any of the information enclosed, please do not hesitate to contact this office.

Yours sincerely,

Dear Sir/Madam,

Re: Planning Application for a wind energy development and all associated works at Largan, Boleysillagh, Cloonmeen, Toobrack, and Tullaghanrock, County Roscommon.

1.0 INTRODUCTION

On behalf of our client, Islandmore Wind Farm Limited ('the Applicant'), please find below notification of a Strategic Infrastructure Development (SID) planning application for the abovementioned proposed development in accordance with Section 37E of the *Planning & Development Act 2000 (as amended)* ('the 2000 Act').

2.0 PRE-APPLICATION CONSULTATION

The Applicant entered into pre-application consultations with An Coimisiún Pleanála (Reference ABP-321711-25), pursuant to Section 37B of the 2000 Act. On 09 April 2026, An Coimisiún Pleanála served notice of its determination that the proposed development constitutes SID and that a planning application for same must be made directly to it.

3.0 DESCRIPTION OF THE PROPOSED DEVELOPMENT

The planning application seeks a 10-year planning permission for a proposed development generally described as follows:-

- 3 no. wind turbines with a hub height of 104 metres, a rotor diameter of 162 metres and an overall tip height of 185 metres;
- 7 no. wind turbines with a hub height of 82 metres, a rotor diameter of 136 metres and an overall tip height of 150 metres;
- All associated turbine foundations and crane hardstanding areas;
- All associated underground electrical and communications cabling;
- Construction of approximately 4 kilometres of wind farm access tracks;
- Construction of 6 no. site entrances and upgrade of 1 no. existing site entrance;
- 2 no. temporary construction compounds;
- 1 no. borrow pit which, when exhausted, will be utilised to permanently store excess excavated material;

- The storage, as required, of excavated material at dedicated spoil deposition areas;
- Felling of approximately 6.5 hectares of commercial forestry plantation to facilitate the construction and operation of wind farm infrastructure;
- All associated and ancillary site development, excavation, construction, landscaping and reinstatement works, permanent and temporary works to public roads along the turbine component haul route, the provision of site drainage infrastructure and environmental mitigation measures; and,
- A 40-year operational life from the date of commissioning of the entire proposed development.

4.0 ENVIRONMENTAL IMPACT ASSESSMENT

An Environmental Impact Assessment Report (EIAR) has been submitted with this planning application to inform the Environmental Impact Assessment (EIA) to be carried out by An Coimisiún Pleanála.

The EIAR is presented as 2 no. volumes, which should be read in conjunction with each other, as follows:-

- **Volume I** comprises the main EIAR text and follows a 'Grouped Format' structure where each environmental factor is assessed and presented as a separate chapter. The EIA Directive prescribes the range of environmental factors which should be used to organise descriptions of the environment and likely environmental effects. These have been supplemented with additional environmental factors owing to the characteristics of the proposed development under assessment, as follows:-
 - Chapter 1: Introduction;
 - Chapter 2: Assessment of Project Alternatives;
 - Chapter 3: Description of the Project;
 - Chapter 4: Population & Human Health;
 - Chapter 5: Biodiversity;
 - Chapter 6: Land & Soils;
 - Chapter 7: Water;
 - Chapter 8: Air Quality
 - Chapter 9: Climate;
 - Chapter 10: Landscape;
 - Chapter 11: Cultural Heritage;
 - Chapter 12: Noise & Vibration;
 - Chapter 13: Shadow Flicker;
 - Chapter 14: Material Assets; and,
 - Chapter 15: Interactions of the Foregoing.
- **Volume II** comprises a range of annexes, including technical data and reports, which informed the impact assessment provided in **Volume I** so as to

ensure the EIAR is transparently supported by evidence. All environmental mitigation measures, as prescribed within the EIAR, have also been compiled into a standalone document and submitted at **Volume II**.

A **Non-Technical Summary** of the EIAR is also provided as a separate standalone volume in order to facilitate the wider public concerned in their involvement in the statutory consultation during the planning application determination stage.

Please note that, in accordance with best practice, some minor, sensitive information has been redacted in the EIAR. This information can be provided upon request.

5.0 APPROPRIATE ASSESSMENT

Following the completion of a Stage 1 Appropriate Assessment Screening, a full NIS (Stage 2) has been prepared and submitted with this planning application. The NIS is presented as a separate, standalone document and submitted to inform a Habitats Directive Appropriate Assessment to be carried out by An Coimisiún Pleanála pursuant to Council Directive 92/43/EEC and Bird Directive 2009/147/EC. The NIS addresses the entirety of the project, including relevant cumulative, off-site, and secondary developments.

The NIS concludes; in light of best scientific knowledge; that there is reasonable scientific certainty that there will be no significant effects from the proposed development, either individually or in combination with other plans or projects, adversely affecting the conservation interests or conservation objectives of any Natura 2000 sites. It is therefore concluded that proposed development will not, beyond reasonable scientific doubt, adversely affect the integrity of any Natura 2000 site either directly or indirectly.

6.0 PLANNING APPLICATION DOCUMENTATION

This planning application is being made directly to An Coimisiún Pleanála under the provisions of Section 37E of the 2000 Act. An Coimisiún Pleanála has instructed the Applicant to notify Inland Fisheries Ireland, as a prescribed body, of the lodgement of the planning application and to furnish you with a copy (or copies) of the planning application documentation.

All planning application and associated documentation is available to view at the dedicated project website; www.islandmorewindfarmsid.ie; which includes:-

- Planning Application Notification Letters to An Coimisiún Pleanála and Roscommon County Council;
- Planning Application Form;
- Site Notice;
- Newspaper Notices (2 no.);
- Letters of Landowner Consent;
- Statutory Undertaker Letter;
- Environmental Impact Assessment Portal Confirmation Notice;
- Planning Application Notification Letter issued to each prescribed body;
- Planning Application Drawings (see Schedule of Drawings attached to the Planning Application Form);

- Environmental Impact Assessment Report, including:
 - Volume I – Assessment of the Project;
 - Volume II – Technical Annexes in support of Volume I;
 - Non-Technical Summary; and
- Natura Impact Statement.

7.0 PLANNING APPLICATION PROCEDURE

You are advised that An Coimisiún Pleanála may, in respect of an application for permission, decide to:-

- (a) (i) grant the permission/approval; or
- (ii) make such modifications to the proposed development as it specifies in its decision and grant permission/approval in respect of the proposed development as so modified; or
- (iii) grant permission/approval in respect of part of the proposed development (with or without specified modifications of the foregoing kind), and any of the above decisions may be subject to or without conditions; or
- (b) Refuse to grant the permission/approval.

Submissions or observations may be made only to An Coimisiún Pleanála, 64 Marlborough Street, Dublin 1; or via the An Coimisiún Pleanála website www.pleanala.ie/en-ie/observations; relating to:-

- (i) The implications of the proposed development for proper planning and sustainable development;
- (ii) The likely effects on the environment of the proposed development; and
- (iii) The likely significant effects of the proposed development on a European site, if carried out.

Any submissions or observations from Inland Fishereis Ireland must be received by An Coimisiún Pleanála no later than 5.30p.m. on 16 December 2026.

8.0 CONCLUSION

This planning application is being lodged with An Coimisiún Pleanála following a determination that the proposed development constitutes a SID. Government policy recognises that onshore wind energy, as a proven and cost effective technology in the context of Ireland's abundant wind resource, will continue to be the major contributor to Ireland's renewable electricity generation to 2030 and the generation of electricity from the proposed development will make a substantial contribution to the reduction of fossil fuel generated electricity and the abatement of greenhouse gas emissions.

The EIAR and NIS submitted with this planning application provide a comprehensive assessment of the likelihood of significant adverse environmental effects arising as a result of the proposed development individually and in combination with other existing, permitted and proposed developments. Overall, it is assessed that any likely adverse environmental effects resulting from the proposed development can be managed and mitigated and that there are lasting social and environmental benefits

as a result of the proposed development.

We trust that the documentation provided is in order and is sufficient for your consideration of this proposed development. Should you have any queries in relation to any of the information enclosed, please do not hesitate to contact this office.

Yours sincerely,

4.0 ENVIRONMENTAL IMPACT ASSESSMENT

An Environmental Impact Assessment Report (EIAR) has been submitted with this planning application to inform the Environmental Impact Assessment (EIA) to be carried out by An Coimisiún Pleanála.

The EIAR is presented as 2 no. volumes, which should be read in conjunction with each other, as follows:-

- **Volume I** comprises the main EIAR text and follows a 'Grouped Format' structure where each environmental factor is assessed and presented as a separate chapter. The EIA Directive prescribes the range of environmental factors which should be used to organise descriptions of the environment and likely environmental effects. These have been supplemented with additional environmental factors owing to the characteristics of the proposed development under assessment, as follows:-
 - Chapter 1: Introduction;
 - Chapter 2: Assessment of Project Alternatives;
 - Chapter 3: Description of the Project;
 - Chapter 4: Population & Human Health;
 - Chapter 5: Biodiversity;
 - Chapter 6: Land & Soils;
 - Chapter 7: Water;
 - Chapter 8: Air Quality
 - Chapter 9: Climate;
 - Chapter 10: Landscape;
 - Chapter 11: Cultural Heritage;
 - Chapter 12: Noise & Vibration;
 - Chapter 13: Shadow Flicker;
 - Chapter 14: Material Assets; and,
 - Chapter 15: Interactions of the Foregoing.
- **Volume II** comprises a range of annexes, including technical data and reports, which informed the impact assessment provided in **Volume I** so as to

ensure the EIAR is transparently supported by evidence. All environmental mitigation measures, as prescribed within the EIAR, have also been compiled into a standalone document and submitted at **Volume II**.

A **Non-Technical Summary** of the EIAR is also provided as a separate standalone volume in order to facilitate the wider public concerned in their involvement in the statutory consultation during the planning application determination stage.

Please note that, in accordance with best practice, some minor, sensitive information has been redacted in the EIAR. This information can be provided upon request.

5.0 APPROPRIATE ASSESSMENT

Following the completion of a Stage 1 Appropriate Assessment Screening, a full NIS (Stage 2) has been prepared and submitted with this planning application. The NIS is presented as a separate, standalone document and submitted to inform a Habitats Directive Appropriate Assessment to be carried out by An Coimisiún Pleanála pursuant to Council Directive 92/43/EEC and Bird Directive 2009/147/EC. The NIS addresses the entirety of the project, including relevant cumulative, off-site, and secondary developments.

The NIS concludes; in light of best scientific knowledge; that there is reasonable scientific certainty that there will be no significant effects from the proposed development, either individually or in combination with other plans or projects, adversely affecting the conservation interests or conservation objectives of any Natura 2000 sites. It is therefore concluded that proposed development will not, beyond reasonable scientific doubt, adversely affect the integrity of any Natura 2000 site either directly or indirectly.

6.0 PLANNING APPLICATION DOCUMENTATION

This planning application is being made directly to An Coimisiún Pleanála under the provisions of Section 37E of the 2000 Act. An Coimisiún Pleanála has instructed the Applicant to notify Ireland West Airport, as a prescribed body, of the lodgement of the planning application and to furnish you with a copy (or copies) of the planning application documentation.

All planning application and associated documentation is available to view at the dedicated project website; www.islandmorewindfarmsid.ie; which includes:-

- Planning Application Notification Letters to An Coimisiún Pleanála and Roscommon County Council;
- Planning Application Form;
- Site Notice;
- Newspaper Notices (2 no.);
- Letters of Landowner Consent;
- Statutory Undertaker Letter;
- Environmental Impact Assessment Portal Confirmation Notice;
- Planning Application Notification Letter issued to each prescribed body;
- Planning Application Drawings (see Schedule of Drawings attached to the Planning Application Form);

- Environmental Impact Assessment Report, including:
 - Volume I – Assessment of the Project;
 - Volume II – Technical Annexes in support of Volume I;
 - Non-Technical Summary; and
- Natura Impact Statement.

7.0 PLANNING APPLICATION PROCEDURE

You are advised that An Coimisiún Pleanála may, in respect of an application for permission, decide to:-

- (a) (i) grant the permission/approval; or
- (ii) make such modifications to the proposed development as it specifies in its decision and grant permission/approval in respect of the proposed development as so modified; or
- (iii) grant permission/approval in respect of part of the proposed development (with or without specified modifications of the foregoing kind), and any of the above decisions may be subject to or without conditions; or
- (b) Refuse to grant the permission/approval.

Submissions or observations may be made only to An Coimisiún Pleanála, 64 Marlborough Street, Dublin 1; or via the An Coimisiún Pleanála website www.pleanala.ie/en-ie/observations; relating to:-

- (i) The implications of the proposed development for proper planning and sustainable development;
- (ii) The likely effects on the environment of the proposed development; and
- (iii) The likely significant effects of the proposed development on a European site, if carried out.

Any submissions or observations from Ireland West Airport must be received by An Coimisiún Pleanála no later than 5.30p.m. on 16 December 2026.

8.0 CONCLUSION

This planning application is being lodged with An Coimisiún Pleanála following a determination that the proposed development constitutes a SID. Government policy recognises that onshore wind energy, as a proven and cost effective technology in the context of Ireland's abundant wind resource, will continue to be the major contributor to Ireland's renewable electricity generation to 2030 and the generation of electricity from the proposed development will make a substantial contribution to the reduction of fossil fuel generated electricity and the abatement of greenhouse gas emissions.

The EIAR and NIS submitted with this planning application provide a comprehensive assessment of the likelihood of significant adverse environmental effects arising as a result of the proposed development individually and in combination with other existing, permitted and proposed developments. Overall, it is assessed that any likely adverse environmental effects resulting from the proposed development can be managed and mitigated and that there are lasting social and environmental benefits

as a result of the proposed development.

Dear Sir/Madam,

Re: Planning Application for a wind energy development and all associated works at Largan, Boleysillagh, Cloonmeen, Toobrack, and Tullaghanrock, County Roscommon.

1.0 INTRODUCTION

On behalf of our client, Islandmore Wind Farm Limited ('the Applicant'), please find below notification of a Strategic Infrastructure Development (SID) planning application for the abovementioned proposed development in accordance with Section 37E of the *Planning & Development Act 2000 (as amended)* ('the 2000 Act').

2.0 PRE-APPLICATION CONSULTATION

The Applicant entered into pre-application consultations with An Coimisiún Pleanála (Reference ABP-321711-25), pursuant to Section 37B of the 2000 Act. On 09 April 2026, An Coimisiún Pleanála served notice of its determination that the proposed development constitutes SID and that a planning application for same must be made directly to it.

3.0 DESCRIPTION OF THE PROPOSED DEVELOPMENT

The planning application seeks a 10-year planning permission for a proposed development generally described as follows:-

- 3 no. wind turbines with a hub height of 104 metres, a rotor diameter of 162 metres and an overall tip height of 185 metres;
- 7 no. wind turbines with a hub height of 82 metres, a rotor diameter of 136 metres and an overall tip height of 150 metres;
- All associated turbine foundations and crane hardstanding areas;
- All associated underground electrical and communications cabling;
- Construction of approximately 4 kilometres of wind farm access tracks;
- Construction of 6 no. site entrances and upgrade of 1 no. existing site entrance;
- 2 no. temporary construction compounds;

- 1 no. borrow pit which, when exhausted, will be utilised to permanently store excess excavated material;
- The storage, as required, of excavated material at dedicated spoil deposition areas;
- Felling of approximately 6.5 hectares of commercial forestry plantation to facilitate the construction and operation of wind farm infrastructure;
- All associated and ancillary site development, excavation, construction, landscaping and reinstatement works, permanent and temporary works to public roads along the turbine component haul route, the provision of site drainage infrastructure and environmental mitigation measures; and,
- A 40-year operational life from the date of commissioning of the entire proposed development.

4.0 ENVIRONMENTAL IMPACT ASSESSMENT

An Environmental Impact Assessment Report (EIAR) has been submitted with this planning application to inform the Environmental Impact Assessment (EIA) to be carried out by An Coimisiún Pleanála.

The EIAR is presented as 2 no. volumes, which should be read in conjunction with each other, as follows:-

- **Volume I** comprises the main EIAR text and follows a 'Grouped Format' structure where each environmental factor is assessed and presented as a separate chapter. The EIA Directive prescribes the range of environmental factors which should be used to organise descriptions of the environment and likely environmental effects. These have been supplemented with additional environmental factors owing to the characteristics of the proposed development under assessment, as follows:-
 - Chapter 1: Introduction;
 - Chapter 2: Assessment of Project Alternatives;
 - Chapter 3: Description of the Project;
 - Chapter 4: Population & Human Health;
 - Chapter 5: Biodiversity;
 - Chapter 6: Land & Soils;
 - Chapter 7: Water;
 - Chapter 8: Air Quality
 - Chapter 9: Climate;
 - Chapter 10: Landscape;
 - Chapter 11: Cultural Heritage;
 - Chapter 12: Noise & Vibration;
 - Chapter 13: Shadow Flicker;
 - Chapter 14: Material Assets; and,
 - Chapter 15: Interactions of the Foregoing.

- **Volume II** comprises a range of annexes, including technical data and reports, which informed the impact assessment provided in **Volume I** so as to ensure the EIAR is transparently supported by evidence. All environmental mitigation measures, as prescribed within the EIAR, have also been compiled into a standalone document and submitted at **Volume II**.

A **Non-Technical Summary** of the EIAR is also provided as a separate standalone volume in order to facilitate the wider public concerned in their involvement in the statutory consultation during the planning application determination stage.

Please note that, in accordance with best practice, some minor, sensitive information has been redacted in the EIAR. This information can be provided upon request.

5.0 APPROPRIATE ASSESSMENT

Following the completion of a Stage 1 Appropriate Assessment Screening, a full NIS (Stage 2) has been prepared and submitted with this planning application. The NIS is presented as a separate, standalone document and submitted to inform a Habitats Directive Appropriate Assessment to be carried out by An Coimisiún Pleanála pursuant to Council Directive 92/43/EEC and Bird Directive 2009/147/EC. The NIS addresses the entirety of the project, including relevant cumulative, off-site, and secondary developments.

The NIS concludes; in light of best scientific knowledge; that there is reasonable scientific certainty that there will be no significant effects from the proposed development, either individually or in combination with other plans or projects, adversely affecting the conservation interests or conservation objectives of any Natura 2000 sites. It is therefore concluded that proposed development will not, beyond reasonable scientific doubt, adversely affect the integrity of any Natura 2000 site either directly or indirectly.

6.0 PLANNING APPLICATION DOCUMENTATION

This planning application is being made directly to An Coimisiún Pleanála under the provisions of Section 37E of the 2000 Act. An Coimisiún Pleanála has instructed the Applicant to notify Mayo County Council, as a prescribed body, of the lodgement of the planning application and to furnish you with a copy (or copies) of the planning application documentation.

All planning application and associated documentation is available to view at the dedicated project website; www.islandmorewindfarmsid.ie; which includes:-

- Planning Application Notification Letters to An Coimisiún Pleanála and Roscommon County Council;
- Planning Application Form;
- Site Notice;
- Newspaper Notices (2 no.);
- Letters of Landowner Consent;
- Statutory Undertaker Letter;
- Environmental Impact Assessment Portal Confirmation Notice;
- Planning Application Notification Letter issued to each prescribed body;

- Planning Application Drawings (see Schedule of Drawings attached to the Planning Application Form);
- Environmental Impact Assessment Report, including:
 - Volume I – Assessment of the Project;
 - Volume II – Technical Annexes in support of Volume I;
 - Non-Technical Summary; and
- Natura Impact Statement.

7.0 PLANNING APPLICATION PROCEDURE

You are advised that An Coimisiún Pleanála may, in respect of an application for permission, decide to:-

- (a) (i) grant the permission/approval; or
- (ii) make such modifications to the proposed development as it specifies in its decision and grant permission/approval in respect of the proposed development as so modified; or
- (iii) grant permission/approval in respect of part of the proposed development (with or without specified modifications of the foregoing kind), and any of the above decisions may be subject to or without conditions; or
- (b) Refuse to grant the permission/approval.

Submissions or observations may be made only to An Coimisiún Pleanála, 64 Marlborough Street, Dublin 1; or via the An Coimisiún Pleanála website www.pleanala.ie/en-ie/observations; relating to:-

- (i) The implications of the proposed development for proper planning and sustainable development;
- (ii) The likely effects on the environment of the proposed development; and
- (iii) The likely significant effects of the proposed development on a European site, if carried out.

Any submissions or observations from Mayo County Council must be received by An Coimisiún Pleanála no later than 5.30p.m. on 16 December 2026.

8.0 CONCLUSION

This planning application is being lodged with An Coimisiún Pleanála following a determination that the proposed development constitutes a SID. Government policy recognises that onshore wind energy, as a proven and cost effective technology in the context of Ireland's abundant wind resource, will continue to be the major contributor to Ireland's renewable electricity generation to 2030 and the generation of electricity from the proposed development will make a substantial contribution to the reduction of fossil fuel generated electricity and the abatement of greenhouse gas emissions.

The EIAR and NIS submitted with this planning application provide a comprehensive assessment of the likelihood of significant adverse environmental effects arising as a result of the proposed development individually and in combination with other existing, permitted and proposed developments. Overall, it is assessed that any likely

adverse environmental effects resulting from the proposed development can be managed and mitigated and that there are lasting social and environmental benefits as a result of the proposed development.

We trust that the documentation provided is in order and is sufficient for your consideration of this proposed development. Should you have any queries in relation to any of the information enclosed, please do not hesitate to contact this office.

Yours sincerely,

Your Ref: --/--

Dear Sir/Madam,

Re: Planning Application for a wind energy development and all associated works at Largan, Boleysillagh, Cloonmeen, Toobrack, and Tullaghanrock, County Roscommon.

1.0 INTRODUCTION

On behalf of our client, Islandmore Wind Farm Limited ('the Applicant'), please find below notification of a Strategic Infrastructure Development (SID) planning application for the abovementioned proposed development in accordance with Section 37E of the *Planning & Development Act 2000 (as amended)* ('the 2000 Act').

2.0 PRE-APPLICATION CONSULTATION

The Applicant entered into pre-application consultations with An Coimisiún Pleanála (Reference ABP-321711-25), pursuant to Section 37B of the 2000 Act. On 09 April 2026, An Coimisiún Pleanála served notice of its determination that the proposed development constitutes SID and that a planning application for same must be made directly to it.

3.0 DESCRIPTION OF THE PROPOSED DEVELOPMENT

The planning application seeks a 10-year planning permission for a proposed development generally described as follows:-

- 3 no. wind turbines with a hub height of 104 metres, a rotor diameter of 162 metres and an overall tip height of 185 metres;
- 7 no. wind turbines with a hub height of 82 metres, a rotor diameter of 136 metres and an overall tip height of 150 metres;
- All associated turbine foundations and crane hardstanding areas;
- All associated underground electrical and communications cabling;
- Construction of approximately 4 kilometres of wind farm access tracks;
- Construction of 6 no. site entrances and upgrade of 1 no. existing site entrance;
- 2 no. temporary construction compounds;

- 1 no. borrow pit which, when exhausted, will be utilised to permanently store excess excavated material;
- The storage, as required, of excavated material at dedicated spoil deposition areas;
- Felling of approximately 6.5 hectares of commercial forestry plantation to facilitate the construction and operation of wind farm infrastructure;
- All associated and ancillary site development, excavation, construction, landscaping and reinstatement works, permanent and temporary works to public roads along the turbine component haul route, the provision of site drainage infrastructure and environmental mitigation measures; and,
- A 40-year operational life from the date of commissioning of the entire proposed development.

4.0 ENVIRONMENTAL IMPACT ASSESSMENT

An Environmental Impact Assessment Report (EIAR) has been submitted with this planning application to inform the Environmental Impact Assessment (EIA) to be carried out by An Coimisiún Pleanála.

The EIAR is presented as 2 no. volumes, which should be read in conjunction with each other, as follows:-

- **Volume I** comprises the main EIAR text and follows a 'Grouped Format' structure where each environmental factor is assessed and presented as a separate chapter. The EIA Directive prescribes the range of environmental factors which should be used to organise descriptions of the environment and likely environmental effects. These have been supplemented with additional environmental factors owing to the characteristics of the proposed development under assessment, as follows:-
 - Chapter 1: Introduction;
 - Chapter 2: Assessment of Project Alternatives;
 - Chapter 3: Description of the Project;
 - Chapter 4: Population & Human Health;
 - Chapter 5: Biodiversity;
 - Chapter 6: Land & Soils;
 - Chapter 7: Water;
 - Chapter 8: Air Quality
 - Chapter 9: Climate;
 - Chapter 10: Landscape;
 - Chapter 11: Cultural Heritage;
 - Chapter 12: Noise & Vibration;
 - Chapter 13: Shadow Flicker;
 - Chapter 14: Material Assets; and,
 - Chapter 15: Interactions of the Foregoing.

- **Volume II** comprises a range of annexes, including technical data and reports, which informed the impact assessment provided in **Volume I** so as to ensure the EIAR is transparently supported by evidence. All environmental mitigation measures, as prescribed within the EIAR, have also been compiled into a standalone document and submitted at **Volume II**.

A **Non-Technical Summary** of the EIAR is also provided as a separate standalone volume in order to facilitate the wider public concerned in their involvement in the statutory consultation during the planning application determination stage.

Please note that, in accordance with best practice, some minor, sensitive information has been redacted in the EIAR. This information can be provided upon request.

5.0 APPROPRIATE ASSESSMENT

Following the completion of a Stage 1 Appropriate Assessment Screening, a full NIS (Stage 2) has been prepared and submitted with this planning application. The NIS is presented as a separate, standalone document and submitted to inform a Habitats Directive Appropriate Assessment to be carried out by An Coimisiún Pleanála pursuant to Council Directive 92/43/EEC and Bird Directive 2009/147/EC. The NIS addresses the entirety of the project, including relevant cumulative, off-site, and secondary developments.

The NIS concludes; in light of best scientific knowledge; that there is reasonable scientific certainty that there will be no significant effects from the proposed development, either individually or in combination with other plans or projects, adversely affecting the conservation interests or conservation objectives of any Natura 2000 sites. It is therefore concluded that proposed development will not, beyond reasonable scientific doubt, adversely affect the integrity of any Natura 2000 site either directly or indirectly.

6.0 PLANNING APPLICATION DOCUMENTATION

This planning application is being made directly to An Coimisiún Pleanála under the provisions of Section 37E of the 2000 Act. An Coimisiún Pleanála has instructed the Applicant to notify the Minister for Climate, Energy and the Environment, as a prescribed body, of the lodgement of the planning application and to furnish you with a copy (or copies) of the planning application documentation.

All planning application and associated documentation is available to view at the dedicated project website; www.islandmorewindfarmsid.ie; which includes:-

- Planning Application Notification Letters to An Coimisiún Pleanála and Roscommon County Council;
- Planning Application Form;
- Site Notice;
- Newspaper Notices (2 no.);
- Letters of Landowner Consent;
- Statutory Undertaker Letter;
- Environmental Impact Assessment Portal Confirmation Notice;
- Planning Application Notification Letter issued to each prescribed body;

- Planning Application Drawings (see Schedule of Drawings attached to the Planning Application Form);
- Environmental Impact Assessment Report, including:
 - Volume I – Assessment of the Project;
 - Volume II – Technical Annexes in support of Volume I;
 - Non-Technical Summary; and
- Natura Impact Statement.

7.0 PLANNING APPLICATION PROCEDURE

You are advised that An Coimisiún Pleanála may, in respect of an application for permission, decide to:-

- (a) (i) grant the permission/approval; or
- (ii) make such modifications to the proposed development as it specifies in its decision and grant permission/approval in respect of the proposed development as so modified; or
- (iii) grant permission/approval in respect of part of the proposed development (with or without specified modifications of the foregoing kind), and any of the above decisions may be subject to or without conditions; or
- (b) Refuse to grant the permission/approval.

Submissions or observations may be made only to An Coimisiún Pleanála, 64 Marlborough Street, Dublin 1; or via the An Coimisiún Pleanála website www.pleanala.ie/en-ie/observations; relating to:-

- (i) The implications of the proposed development for proper planning and sustainable development;
- (ii) The likely effects on the environment of the proposed development; and
- (iii) The likely significant effects of the proposed development on a European site, if carried out.

Any submissions or observations from the Minister must be received by An Coimisiún Pleanála no later than 5.30p.m. on 16 December 2026.

8.0 CONCLUSION

This planning application is being lodged with An Coimisiún Pleanála following a determination that the proposed development constitutes a SID. Government policy recognises that onshore wind energy, as a proven and cost effective technology in the context of Ireland's abundant wind resource, will continue to be the major contributor to Ireland's renewable electricity generation to 2030 and the generation of electricity from the proposed development will make a substantial contribution to the reduction of fossil fuel generated electricity and the abatement of greenhouse gas emissions.

The EIAR and NIS submitted with this planning application provide a comprehensive assessment of the likelihood of significant adverse environmental effects arising as a result of the proposed development individually and in combination with other existing, permitted and proposed developments. Overall, it is assessed that any likely

adverse environmental effects resulting from the proposed development can be managed and mitigated and that there are lasting social and environmental benefits as a result of the proposed development.

We trust that the documentation provided is in order and is sufficient for your consideration of this proposed development. Should you have any queries in relation to any of the information enclosed, please do not hesitate to contact this office.

Yours sincerely,

Dear Sir/Madam,

Re: Planning Application for a wind energy development and all associated works at Largan, Boleysillagh, Cloonmeen, Toobrack, and Tullaghanrock, County Roscommon.

1.0 INTRODUCTION

On behalf of our client, Islandmore Wind Farm Limited ('the Applicant'), please find below notification of a Strategic Infrastructure Development (SID) planning application for the abovementioned proposed development in accordance with Section 37E of the *Planning & Development Act 2000 (as amended)* ('the 2000 Act').

2.0 PRE-APPLICATION CONSULTATION

The Applicant entered into pre-application consultations with An Coimisiún Pleanála (Reference ABP-321711-25), pursuant to Section 37B of the 2000 Act. On 09 April 2026, An Coimisiún Pleanála served notice of its determination that the proposed development constitutes SID and that a planning application for same must be made directly to it.

3.0 DESCRIPTION OF THE PROPOSED DEVELOPMENT

The planning application seeks a 10-year planning permission for a proposed development generally described as follows:-

- 3 no. wind turbines with a hub height of 104 metres, a rotor diameter of 162 metres and an overall tip height of 185 metres;
- 7 no. wind turbines with a hub height of 82 metres, a rotor diameter of 136 metres and an overall tip height of 150 metres;
- All associated turbine foundations and crane hardstanding areas;
- All associated underground electrical and communications cabling;
- Construction of approximately 4 kilometres of wind farm access tracks;
- Construction of 6 no. site entrances and upgrade of 1 no. existing site entrance;
- 2 no. temporary construction compounds;

- 1 no. borrow pit which, when exhausted, will be utilised to permanently store excess excavated material;
- The storage, as required, of excavated material at dedicated spoil deposition areas;
- Felling of approximately 6.5 hectares of commercial forestry plantation to facilitate the construction and operation of wind farm infrastructure;
- All associated and ancillary site development, excavation, construction, landscaping and reinstatement works, permanent and temporary works to public roads along the turbine component haul route, the provision of site drainage infrastructure and environmental mitigation measures; and,
- A 40-year operational life from the date of commissioning of the entire proposed development.

4.0 ENVIRONMENTAL IMPACT ASSESSMENT

An Environmental Impact Assessment Report (EIAR) has been submitted with this planning application to inform the Environmental Impact Assessment (EIA) to be carried out by An Coimisiún Pleanála.

The EIAR is presented as 2 no. volumes, which should be read in conjunction with each other, as follows:-

- **Volume I** comprises the main EIAR text and follows a 'Grouped Format' structure where each environmental factor is assessed and presented as a separate chapter. The EIA Directive prescribes the range of environmental factors which should be used to organise descriptions of the environment and likely environmental effects. These have been supplemented with additional environmental factors owing to the characteristics of the proposed development under assessment, as follows:-
 - Chapter 1: Introduction;
 - Chapter 2: Assessment of Project Alternatives;
 - Chapter 3: Description of the Project;
 - Chapter 4: Population & Human Health;
 - Chapter 5: Biodiversity;
 - Chapter 6: Land & Soils;
 - Chapter 7: Water;
 - Chapter 8: Air Quality
 - Chapter 9: Climate;
 - Chapter 10: Landscape;
 - Chapter 11: Cultural Heritage;
 - Chapter 12: Noise & Vibration;
 - Chapter 13: Shadow Flicker;
 - Chapter 14: Material Assets; and,
 - Chapter 15: Interactions of the Foregoing.

- **Volume II** comprises a range of annexes, including technical data and reports, which informed the impact assessment provided in **Volume I** so as to ensure the EIAR is transparently supported by evidence. All environmental mitigation measures, as prescribed within the EIAR, have also been compiled into a standalone document and submitted at **Volume II**.

A **Non-Technical Summary** of the EIAR is also provided as a separate standalone volume in order to facilitate the wider public concerned in their involvement in the statutory consultation during the planning application determination stage.

Please note that, in accordance with best practice, some minor, sensitive information has been redacted in the EIAR. This information can be provided upon request.

5.0 APPROPRIATE ASSESSMENT

Following the completion of a Stage 1 Appropriate Assessment Screening, a full NIS (Stage 2) has been prepared and submitted with this planning application. The NIS is presented as a separate, standalone document and submitted to inform a Habitats Directive Appropriate Assessment to be carried out by An Coimisiún Pleanála pursuant to Council Directive 92/43/EEC and Bird Directive 2009/147/EC. The NIS addresses the entirety of the project, including relevant cumulative, off-site, and secondary developments.

The NIS concludes; in light of best scientific knowledge; that there is reasonable scientific certainty that there will be no significant effects from the proposed development, either individually or in combination with other plans or projects, adversely affecting the conservation interests or conservation objectives of any Natura 2000 sites. It is therefore concluded that proposed development will not, beyond reasonable scientific doubt, adversely affect the integrity of any Natura 2000 site either directly or indirectly.

6.0 PLANNING APPLICATION DOCUMENTATION

This planning application is being made directly to An Coimisiún Pleanála under the provisions of Section 37E of the 2000 Act. An Coimisiún Pleanála has instructed the Applicant to notify Sligo County Council, as a prescribed body, of the lodgement of the planning application and to furnish you with a copy (or copies) of the planning application documentation.

All planning application and associated documentation is available to view at the dedicated project website; www.islandmorewindfarmsid.ie; which includes:-

- Planning Application Notification Letters to An Coimisiún Pleanála and Roscommon County Council;
- Planning Application Form;
- Site Notice;
- Newspaper Notices (2 no.);
- Letters of Landowner Consent;
- Statutory Undertaker Letter;
- Environmental Impact Assessment Portal Confirmation Notice;
- Planning Application Notification Letter issued to each prescribed body;

- Planning Application Drawings (see Schedule of Drawings attached to the Planning Application Form);
- Environmental Impact Assessment Report, including:
 - Volume I – Assessment of the Project;
 - Volume II – Technical Annexes in support of Volume I;
 - Non-Technical Summary; and
- Natura Impact Statement.

7.0 PLANNING APPLICATION PROCEDURE

You are advised that An Coimisiún Pleanála may, in respect of an application for permission, decide to:-

- (a) (i) grant the permission/approval; or
- (ii) make such modifications to the proposed development as it specifies in its decision and grant permission/approval in respect of the proposed development as so modified; or
- (iii) grant permission/approval in respect of part of the proposed development (with or without specified modifications of the foregoing kind), and any of the above decisions may be subject to or without conditions; or
- (b) Refuse to grant the permission/approval.

Submissions or observations may be made only to An Coimisiún Pleanála, 64 Marlborough Street, Dublin 1; or via the An Coimisiún Pleanála website www.pleanala.ie/en-ie/observations; relating to:-

- (i) The implications of the proposed development for proper planning and sustainable development;
- (ii) The likely effects on the environment of the proposed development; and
- (iii) The likely significant effects of the proposed development on a European site, if carried out.

Any submissions or observations from Sligo County Council must be received by An Coimisiún Pleanála no later than 5.30p.m. on 16 December 2026.

8.0 CONCLUSION

This planning application is being lodged with An Coimisiún Pleanála following a determination that the proposed development constitutes a SID. Government policy recognises that onshore wind energy, as a proven and cost effective technology in the context of Ireland's abundant wind resource, will continue to be the major contributor to Ireland's renewable electricity generation to 2030 and the generation of electricity from the proposed development will make a substantial contribution to the reduction of fossil fuel generated electricity and the abatement of greenhouse gas emissions.

The EIAR and NIS submitted with this planning application provide a comprehensive assessment of the likelihood of significant adverse environmental effects arising as a result of the proposed development individually and in combination with other existing, permitted and proposed developments. Overall, it is assessed that any likely

adverse environmental effects resulting from the proposed development can be managed and mitigated and that there are lasting social and environmental benefits as a result of the proposed development.

We trust that the documentation provided is in order and is sufficient for your consideration of this proposed development. Should you have any queries in relation to any of the information enclosed, please do not hesitate to contact this office.

- A 40-year operational life from the date of commissioning of the entire proposed development.

4.0 ENVIRONMENTAL IMPACT ASSESSMENT

An Environmental Impact Assessment Report (EIAR) has been submitted with this planning application to inform the Environmental Impact Assessment (EIA) to be carried out by An Coimisiún Pleanála.

The EIAR is presented as 2 no. volumes, which should be read in conjunction with each other, as follows:-

- **Volume I** comprises the main EIAR text and follows a 'Grouped Format' structure where each environmental factor is assessed and presented as a separate chapter. The EIA Directive prescribes the range of environmental factors which should be used to organise descriptions of the environment and likely environmental effects. These have been supplemented with additional environmental factors owing to the characteristics of the proposed development under assessment, as follows:-
 - Chapter 1: Introduction;
 - Chapter 2: Assessment of Project Alternatives;
 - Chapter 3: Description of the Project;
 - Chapter 4: Population & Human Health;
 - Chapter 5: Biodiversity;
 - Chapter 6: Land & Soils;
 - Chapter 7: Water;
 - Chapter 8: Air Quality
 - Chapter 9: Climate;
 - Chapter 10: Landscape;
 - Chapter 11: Cultural Heritage;
 - Chapter 12: Noise & Vibration;
 - Chapter 13: Shadow Flicker;
 - Chapter 14: Material Assets; and,
 - Chapter 15: Interactions of the Foregoing.
- **Volume II** comprises a range of annexes, including technical data and reports, which informed the impact assessment provided in **Volume I** so as to

ensure the EIAR is transparently supported by evidence. All environmental mitigation measures, as prescribed within the EIAR, have also been compiled into a standalone document and submitted at **Volume II**.

A **Non-Technical Summary** of the EIAR is also provided as a separate standalone volume in order to facilitate the wider public concerned in their involvement in the statutory consultation during the planning application determination stage.

Please note that, in accordance with best practice, some minor, sensitive information has been redacted in the EIAR. This information can be provided upon request.

5.0 APPROPRIATE ASSESSMENT

Following the completion of a Stage 1 Appropriate Assessment Screening, a full NIS (Stage 2) has been prepared and submitted with this planning application. The NIS is presented as a separate, standalone document and submitted to inform a Habitats Directive Appropriate Assessment to be carried out by An Coimisiún Pleanála pursuant to Council Directive 92/43/EEC and Bird Directive 2009/147/EC. The NIS addresses the entirety of the project, including relevant cumulative, off-site, and secondary developments.

The NIS concludes; in light of best scientific knowledge; that there is reasonable scientific certainty that there will be no significant effects from the proposed development, either individually or in combination with other plans or projects, adversely affecting the conservation interests or conservation objectives of any Natura 2000 sites. It is therefore concluded that proposed development will not, beyond reasonable scientific doubt, adversely affect the integrity of any Natura 2000 site either directly or indirectly.

6.0 PLANNING APPLICATION DOCUMENTATION

This planning application is being made directly to An Coimisiún Pleanála under the provisions of Section 37E of the 2000 Act. An Coimisiún Pleanála has instructed the Applicant to notify Transport Infrastructure Ireland, as a prescribed body, of the lodgement of the planning application and to furnish you with a copy (or copies) of the planning application documentation.

All planning application and associated documentation is available to view at the dedicated project website; www.islandmorewindfarmsid.ie; which includes:-

- Planning Application Notification Letters to An Coimisiún Pleanála and Roscommon County Council;
- Planning Application Form;
- Site Notice;
- Newspaper Notices (2 no.);
- Letters of Landowner Consent;
- Statutory Undertaker Letter;
- Environmental Impact Assessment Portal Confirmation Notice;
- Planning Application Notification Letter issued to each prescribed body;
- Planning Application Drawings (see Schedule of Drawings attached to the Planning Application Form);

- Environmental Impact Assessment Report, including:
 - Volume I – Assessment of the Project;
 - Volume II – Technical Annexes in support of Volume I;
 - Non-Technical Summary; and
- Natura Impact Statement.

7.0 PLANNING APPLICATION PROCEDURE

You are advised that An Coimisiún Pleanála may, in respect of an application for permission, decide to:-

- (a) (i) grant the permission/approval; or
- (ii) make such modifications to the proposed development as it specifies in its decision and grant permission/approval in respect of the proposed development as so modified; or
- (iii) grant permission/approval in respect of part of the proposed development (with or without specified modifications of the foregoing kind), and any of the above decisions may be subject to or without conditions; or
- (b) Refuse to grant the permission/approval.

Submissions or observations may be made only to An Coimisiún Pleanála, 64 Marlborough Street, Dublin 1; or via the An Coimisiún Pleanála website www.pleanala.ie/en-ie/observations; relating to:-

- (i) The implications of the proposed development for proper planning and sustainable development;
- (ii) The likely effects on the environment of the proposed development; and
- (iii) The likely significant effects of the proposed development on a European site, if carried out.

Any submissions or observations from Transport Infrastructure Ireland must be received by An Coimisiún Pleanála no later than 5.30p.m. on 16 December 2026.

8.0 CONCLUSION

This planning application is being lodged with An Coimisiún Pleanála following a determination that the proposed development constitutes a SID. Government policy recognises that onshore wind energy, as a proven and cost effective technology in the context of Ireland's abundant wind resource, will continue to be the major contributor to Ireland's renewable electricity generation to 2030 and the generation of electricity from the proposed development will make a substantial contribution to the reduction of fossil fuel generated electricity and the abatement of greenhouse gas emissions.

The EIAR and NIS submitted with this planning application provide a comprehensive assessment of the likelihood of significant adverse environmental effects arising as a result of the proposed development individually and in combination with other existing, permitted and proposed developments. Overall, it is assessed that any likely adverse environmental effects resulting from the proposed development can be managed and mitigated and that there are lasting social and environmental benefits

as a result of the proposed development.

We trust that the documentation provided is in order and is sufficient for your consideration of this proposed development. Should you have any queries in relation to any of the information enclosed, please do not hesitate to contact this office.

Dear Sir/Madam,

Re: Planning Application for a wind energy development and all associated works at Largan, Boleysillagh, Cloonmeen, Toobrack, and Tullaghanrock, County Roscommon.

1.0 INTRODUCTION

On behalf of our client, Islandmore Wind Farm Limited ('the Applicant'), please find below notification of a Strategic Infrastructure Development (SID) planning application for the abovementioned proposed development in accordance with Section 37E of the *Planning & Development Act 2000 (as amended)* ('the 2000 Act').

2.0 PRE-APPLICATION CONSULTATION

The Applicant entered into pre-application consultations with An Coimisiún Pleanála (Reference ABP-321711-25), pursuant to Section 37B of the 2000 Act. On 09 April 2026, An Coimisiún Pleanála served notice of its determination that the proposed development constitutes SID and that a planning application for same must be made directly to it.

3.0 DESCRIPTION OF THE PROPOSED DEVELOPMENT

The planning application seeks a 10-year planning permission for a proposed development generally described as follows:-

- 3 no. wind turbines with a hub height of 104 metres, a rotor diameter of 162 metres and an overall tip height of 185 metres;
- 7 no. wind turbines with a hub height of 82 metres, a rotor diameter of 136 metres and an overall tip height of 150 metres;
- All associated turbine foundations and crane hardstanding areas;
- All associated underground electrical and communications cabling;
- Construction of approximately 4 kilometres of wind farm access tracks;
- Construction of 6 no. site entrances and upgrade of 1 no. existing site entrance;
- 2 no. temporary construction compounds;
- 1 no. borrow pit which, when exhausted, will be utilised to permanently store excess excavated material;

- The storage, as required, of excavated material at dedicated spoil deposition areas;
- Felling of approximately 6.5 hectares of commercial forestry plantation to facilitate the construction and operation of wind farm infrastructure;
- All associated and ancillary site development, excavation, construction, landscaping and reinstatement works, permanent and temporary works to public roads along the turbine component haul route, the provision of site drainage infrastructure and environmental mitigation measures; and,
- A 40-year operational life from the date of commissioning of the entire proposed development.

4.0 ENVIRONMENTAL IMPACT ASSESSMENT

An Environmental Impact Assessment Report (EIAR) has been submitted with this planning application to inform the Environmental Impact Assessment (EIA) to be carried out by An Coimisiún Pleanála.

The EIAR is presented as 2 no. volumes, which should be read in conjunction with each other, as follows:-

- **Volume I** comprises the main EIAR text and follows a 'Grouped Format' structure where each environmental factor is assessed and presented as a separate chapter. The EIA Directive prescribes the range of environmental factors which should be used to organise descriptions of the environment and likely environmental effects. These have been supplemented with additional environmental factors owing to the characteristics of the proposed development under assessment, as follows:-
 - Chapter 1: Introduction;
 - Chapter 2: Assessment of Project Alternatives;
 - Chapter 3: Description of the Project;
 - Chapter 4: Population & Human Health;
 - Chapter 5: Biodiversity;
 - Chapter 6: Land & Soils;
 - Chapter 7: Water;
 - Chapter 8: Air Quality
 - Chapter 9: Climate;
 - Chapter 10: Landscape;
 - Chapter 11: Cultural Heritage;
 - Chapter 12: Noise & Vibration;
 - Chapter 13: Shadow Flicker;
 - Chapter 14: Material Assets; and,
 - Chapter 15: Interactions of the Foregoing.
- **Volume II** comprises a range of annexes, including technical data and reports, which informed the impact assessment provided in **Volume I** so as to

ensure the EIAR is transparently supported by evidence. All environmental mitigation measures, as prescribed within the EIAR, have also been compiled into a standalone document and submitted at **Volume II**.

A **Non-Technical Summary** of the EIAR is also provided as a separate standalone volume in order to facilitate the wider public concerned in their involvement in the statutory consultation during the planning application determination stage.

Please note that, in accordance with best practice, some minor, sensitive information has been redacted in the EIAR. This information can be provided upon request.

5.0 APPROPRIATE ASSESSMENT

Following the completion of a Stage 1 Appropriate Assessment Screening, a full NIS (Stage 2) has been prepared and submitted with this planning application. The NIS is presented as a separate, standalone document and submitted to inform a Habitats Directive Appropriate Assessment to be carried out by An Coimisiún Pleanála pursuant to Council Directive 92/43/EEC and Bird Directive 2009/147/EC. The NIS addresses the entirety of the project, including relevant cumulative, off-site, and secondary developments.

The NIS concludes; in light of best scientific knowledge; that there is reasonable scientific certainty that there will be no significant effects from the proposed development, either individually or in combination with other plans or projects, adversely affecting the conservation interests or conservation objectives of any Natura 2000 sites. It is therefore concluded that proposed development will not, beyond reasonable scientific doubt, adversely affect the integrity of any Natura 2000 site either directly or indirectly.

6.0 PLANNING APPLICATION DOCUMENTATION

This planning application is being made directly to An Coimisiún Pleanála under the provisions of Section 37E of the 2000 Act. An Coimisiún Pleanála has instructed the Applicant to notify Uisce Éireann, as a prescribed body, of the lodgement of the planning application and to furnish you with a copy (or copies) of the planning application documentation.

All planning application and associated documentation is available to view at the dedicated project website; www.islandmorewindfarmsid.ie; which includes:-

- Planning Application Notification Letters to An Coimisiún Pleanála and Roscommon County Council;
- Planning Application Form;
- Site Notice;
- Newspaper Notices (2 no.);
- Letters of Landowner Consent;
- Statutory Undertaker Letter;
- Environmental Impact Assessment Portal Confirmation Notice;
- Planning Application Notification Letter issued to each prescribed body;
- Planning Application Drawings (see Schedule of Drawings attached to the Planning Application Form);

- Environmental Impact Assessment Report, including:
 - Volume I – Assessment of the Project;
 - Volume II – Technical Annexes in support of Volume I;
 - Non-Technical Summary; and
- Natura Impact Statement.

7.0 PLANNING APPLICATION PROCEDURE

You are advised that An Coimisiún Pleanála may, in respect of an application for permission, decide to:-

- (a) (i) grant the permission/approval; or
- (ii) make such modifications to the proposed development as it specifies in its decision and grant permission/approval in respect of the proposed development as so modified; or
- (iii) grant permission/approval in respect of part of the proposed development (with or without specified modifications of the foregoing kind), and any of the above decisions may be subject to or without conditions; or
- (b) Refuse to grant the permission/approval.

Submissions or observations may be made only to An Coimisiún Pleanála, 64 Marlborough Street, Dublin 1; or via the An Coimisiún Pleanála website www.pleanala.ie/en-ie/observations; relating to:-

- (i) The implications of the proposed development for proper planning and sustainable development;
- (ii) The likely effects on the environment of the proposed development; and
- (iii) The likely significant effects of the proposed development on a European site, if carried out.

Any submissions or observations from Uisce Eireann must be received by An Coimisiún Pleanála no later than 5.30p.m. on 16 December 2026.

8.0 CONCLUSION

This planning application is being lodged with An Coimisiún Pleanála following a determination that the proposed development constitutes a SID. Government policy recognises that onshore wind energy, as a proven and cost effective technology in the context of Ireland's abundant wind resource, will continue to be the major contributor to Ireland's renewable electricity generation to 2030 and the generation of electricity from the proposed development will make a substantial contribution to the reduction of fossil fuel generated electricity and the abatement of greenhouse gas emissions.

The EIAR and NIS submitted with this planning application provide a comprehensive assessment of the likelihood of significant adverse environmental effects arising as a result of the proposed development individually and in combination with other existing, permitted and proposed developments. Overall, it is assessed that any likely adverse environmental effects resulting from the proposed development can be managed and mitigated and that there are lasting social and environmental benefits

as a result of the proposed development.

We trust that the documentation provided is in order and is sufficient for your consideration of this proposed development. Should you have any queries in relation to any of the information enclosed, please do not hesitate to contact this office.

Yours sincerely,

Your Ref: --/--

Dear Sir/Madam,

Re: Planning Application for a wind energy development and all associated works at Largan, Boleysillagh, Cloonmeen, Toobrack, and Tullaghanrock, County Roscommon.

1.0 INTRODUCTION

On behalf of our client, Islandmore Wind Farm Limited ('the Applicant'), please find below notification of a Strategic Infrastructure Development (SID) planning application for the abovementioned proposed development in accordance with Section 37E of the *Planning & Development Act 2000 (as amended)* ('the 2000 Act').

2.0 PRE-APPLICATION CONSULTATION

The Applicant entered into pre-application consultations with An Coimisiún Pleanála (Reference ABP-321711-25), pursuant to Section 37B of the 2000 Act. On 09 April 2026, An Coimisiún Pleanála served notice of its determination that the proposed development constitutes SID and that a planning application for same must be made directly to it.

3.0 DESCRIPTION OF THE PROPOSED DEVELOPMENT

The planning application seeks a 10-year planning permission for a proposed development generally described as follows:-

- 3 no. wind turbines with a hub height of 104 metres, a rotor diameter of 162 metres and an overall tip height of 185 metres;
- 7 no. wind turbines with a hub height of 82 metres, a rotor diameter of 136 metres and an overall tip height of 150 metres;
- All associated turbine foundations and crane hardstanding areas;
- All associated underground electrical and communications cabling;
- Construction of approximately 4 kilometres of wind farm access tracks;
- Construction of 6 no. site entrances and upgrade of 1 no. existing site entrance;
- 2 no. temporary construction compounds;

- 1 no. borrow pit which, when exhausted, will be utilised to permanently store excess excavated material;
- The storage, as required, of excavated material at dedicated spoil deposition areas;
- Felling of approximately 6.5 hectares of commercial forestry plantation to facilitate the construction and operation of wind farm infrastructure;
- All associated and ancillary site development, excavation, construction, landscaping and reinstatement works, permanent and temporary works to public roads along the turbine component haul route, the provision of site drainage infrastructure and environmental mitigation measures; and,
- A 40-year operational life from the date of commissioning of the entire proposed development.

4.0 ENVIRONMENTAL IMPACT ASSESSMENT

An Environmental Impact Assessment Report (EIAR) has been submitted with this planning application to inform the Environmental Impact Assessment (EIA) to be carried out by An Coimisiún Pleanála.

The EIAR is presented as 2 no. volumes, which should be read in conjunction with each other, as follows:-

- **Volume I** comprises the main EIAR text and follows a 'Grouped Format' structure where each environmental factor is assessed and presented as a separate chapter. The EIA Directive prescribes the range of environmental factors which should be used to organise descriptions of the environment and likely environmental effects. These have been supplemented with additional environmental factors owing to the characteristics of the proposed development under assessment, as follows:-
 - Chapter 1: Introduction;
 - Chapter 2: Assessment of Project Alternatives;
 - Chapter 3: Description of the Project;
 - Chapter 4: Population & Human Health;
 - Chapter 5: Biodiversity;
 - Chapter 6: Land & Soils;
 - Chapter 7: Water;
 - Chapter 8: Air Quality
 - Chapter 9: Climate;
 - Chapter 10: Landscape;
 - Chapter 11: Cultural Heritage;
 - Chapter 12: Noise & Vibration;
 - Chapter 13: Shadow Flicker;
 - Chapter 14: Material Assets; and,
 - Chapter 15: Interactions of the Foregoing.

- **Volume II** comprises a range of annexes, including technical data and reports, which informed the impact assessment provided in **Volume I** so as to ensure the EIAR is transparently supported by evidence. All environmental mitigation measures, as prescribed within the EIAR, have also been compiled into a standalone document and submitted at **Volume II**.

A **Non-Technical Summary** of the EIAR is also provided as a separate standalone volume in order to facilitate the wider public concerned in their involvement in the statutory consultation during the planning application determination stage.

Please note that, in accordance with best practice, some minor, sensitive information has been redacted in the EIAR. This information can be provided upon request.

5.0 APPROPRIATE ASSESSMENT

Following the completion of a Stage 1 Appropriate Assessment Screening, a full NIS (Stage 2) has been prepared and submitted with this planning application. The NIS is presented as a separate, standalone document and submitted to inform a Habitats Directive Appropriate Assessment to be carried out by An Coimisiún Pleanála pursuant to Council Directive 92/43/EEC and Bird Directive 2009/147/EC. The NIS addresses the entirety of the project, including relevant cumulative, off-site, and secondary developments.

The NIS concludes; in light of best scientific knowledge; that there is reasonable scientific certainty that there will be no significant effects from the proposed development, either individually or in combination with other plans or projects, adversely affecting the conservation interests or conservation objectives of any Natura 2000 sites. It is therefore concluded that proposed development will not, beyond reasonable scientific doubt, adversely affect the integrity of any Natura 2000 site either directly or indirectly.

6.0 PLANNING APPLICATION DOCUMENTATION

This planning application is being made directly to An Coimisiún Pleanála under the provisions of Section 37E of the 2000 Act. An Coimisiún Pleanála has instructed the Applicant to notify the Northern & Western Regional Assembly, as a prescribed body, of the lodgement of the planning application and to furnish you with a copy (or copies) of the planning application documentation.

All planning application and associated documentation is available to view at the dedicated project website; www.islandmorewindfarmsid.ie; which includes:-

- Planning Application Notification Letters to An Coimisiún Pleanála and Roscommon County Council;
- Planning Application Form;
- Site Notice;
- Newspaper Notices (2 no.);
- Letters of Landowner Consent;
- Statutory Undertaker Letter;
- Environmental Impact Assessment Portal Confirmation Notice;
- Planning Application Notification Letter issued to each prescribed body;

- Planning Application Drawings (see Schedule of Drawings attached to the Planning Application Form);
- Environmental Impact Assessment Report, including:
 - Volume I – Assessment of the Project;
 - Volume II – Technical Annexes in support of Volume I;
 - Non-Technical Summary; and
- Natura Impact Statement.

7.0 PLANNING APPLICATION PROCEDURE

You are advised that An Coimisiún Pleanála may, in respect of an application for permission, decide to:-

- (a) (i) grant the permission/approval; or
- (ii) make such modifications to the proposed development as it specifies in its decision and grant permission/approval in respect of the proposed development as so modified; or
- (iii) grant permission/approval in respect of part of the proposed development (with or without specified modifications of the foregoing kind), and any of the above decisions may be subject to or without conditions; or
- (b) Refuse to grant the permission/approval.

Submissions or observations may be made only to An Coimisiún Pleanála, 64 Marlborough Street, Dublin 1; or via the An Coimisiún Pleanála website www.pleanala.ie/en-ie/observations; relating to:-

- (i) The implications of the proposed development for proper planning and sustainable development;
- (ii) The likely effects on the environment of the proposed development; and
- (iii) The likely significant effects of the proposed development on a European site, if carried out.

Any submissions or observations from the Northern & Western Regional Assembly must be received by An Coimisiún Pleanála no later than 5.30p.m. on 16 December 2026.

8.0 CONCLUSION

This planning application is being lodged with An Coimisiún Pleanála following a determination that the proposed development constitutes a SID. Government policy recognises that onshore wind energy, as a proven and cost effective technology in the context of Ireland's abundant wind resource, will continue to be the major contributor to Ireland's renewable electricity generation to 2030 and the generation of electricity from the proposed development will make a substantial contribution to the reduction of fossil fuel generated electricity and the abatement of greenhouse gas emissions.

The EIAR and NIS submitted with this planning application provide a comprehensive assessment of the likelihood of significant adverse environmental effects arising as a result of the proposed development individually and in combination with other existing, permitted and proposed developments. Overall, it is assessed that any likely

adverse environmental effects resulting from the proposed development can be managed and mitigated and that there are lasting social and environmental benefits as a result of the proposed development.

We trust that the documentation provided is in order and is sufficient for your consideration of this proposed development. Should you have any queries in relation to any of the information enclosed, please do not hesitate to contact this office.

Dear Sir/Madam,

Re: Planning Application for a wind energy development and all associated works at Largan, Boleysillagh, Cloonmeen, Toobrack, and Tullaghanrock, County Roscommon.

1.0 INTRODUCTION

On behalf of our client, Islandmore Wind Farm Limited ('the Applicant'), please find below notification of a Strategic Infrastructure Development (SID) planning application for the abovementioned proposed development in accordance with Section 37E of the *Planning & Development Act 2000 (as amended)* ('the 2000 Act').

2.0 PRE-APPLICATION CONSULTATION

The Applicant entered into pre-application consultations with An Coimisiún Pleanála (Reference ABP-321711-25), pursuant to Section 37B of the 2000 Act. On 09 April 2026, An Coimisiún Pleanála served notice of its determination that the proposed development constitutes SID and that a planning application for same must be made directly to it.

3.0 DESCRIPTION OF THE PROPOSED DEVELOPMENT

The planning application seeks a 10-year planning permission for a proposed development generally described as follows:-

- 3 no. wind turbines with a hub height of 104 metres, a rotor diameter of 162 metres and an overall tip height of 185 metres;
- 7 no. wind turbines with a hub height of 82 metres, a rotor diameter of 136 metres and an overall tip height of 150 metres;
- All associated turbine foundations and crane hardstanding areas;
- All associated underground electrical and communications cabling;
- Construction of approximately 4 kilometres of wind farm access tracks;
- Construction of 6 no. site entrances and upgrade of 1 no. existing site entrance;
- 2 no. temporary construction compounds;
- 1 no. borrow pit which, when exhausted, will be utilised to permanently store excess excavated material;

- The storage, as required, of excavated material at dedicated spoil deposition areas;
- Felling of approximately 6.5 hectares of commercial forestry plantation to facilitate the construction and operation of wind farm infrastructure;
- All associated and ancillary site development, excavation, construction, landscaping and reinstatement works, permanent and temporary works to public roads along the turbine component haul route, the provision of site drainage infrastructure and environmental mitigation measures; and,
- A 40-year operational life from the date of commissioning of the entire proposed development.

4.0 ENVIRONMENTAL IMPACT ASSESSMENT

An Environmental Impact Assessment Report (EIAR) has been submitted with this planning application to inform the Environmental Impact Assessment (EIA) to be carried out by An Coimisiún Pleanála.

The EIAR is presented as 2 no. volumes, which should be read in conjunction with each other, as follows:-

- **Volume I** comprises the main EIAR text and follows a 'Grouped Format' structure where each environmental factor is assessed and presented as a separate chapter. The EIA Directive prescribes the range of environmental factors which should be used to organise descriptions of the environment and likely environmental effects. These have been supplemented with additional environmental factors owing to the characteristics of the proposed development under assessment, as follows:-
 - Chapter 1: Introduction;
 - Chapter 2: Assessment of Project Alternatives;
 - Chapter 3: Description of the Project;
 - Chapter 4: Population & Human Health;
 - Chapter 5: Biodiversity;
 - Chapter 6: Land & Soils;
 - Chapter 7: Water;
 - Chapter 8: Air Quality
 - Chapter 9: Climate;
 - Chapter 10: Landscape;
 - Chapter 11: Cultural Heritage;
 - Chapter 12: Noise & Vibration;
 - Chapter 13: Shadow Flicker;
 - Chapter 14: Material Assets; and,
 - Chapter 15: Interactions of the Foregoing.
- **Volume II** comprises a range of annexes, including technical data and reports, which informed the impact assessment provided in **Volume I** so as to

ensure the EIAR is transparently supported by evidence. All environmental mitigation measures, as prescribed within the EIAR, have also been compiled into a standalone document and submitted at **Volume II**.

A **Non-Technical Summary** of the EIAR is also provided as a separate standalone volume in order to facilitate the wider public concerned in their involvement in the statutory consultation during the planning application determination stage.

Please note that, in accordance with best practice, some minor, sensitive information has been redacted in the EIAR. This information can be provided upon request.

5.0 APPROPRIATE ASSESSMENT

Following the completion of a Stage 1 Appropriate Assessment Screening, a full NIS (Stage 2) has been prepared and submitted with this planning application. The NIS is presented as a separate, standalone document and submitted to inform a Habitats Directive Appropriate Assessment to be carried out by An Coimisiún Pleanála pursuant to Council Directive 92/43/EEC and Bird Directive 2009/147/EC. The NIS addresses the entirety of the project, including relevant cumulative, off-site, and secondary developments.

The NIS concludes; in light of best scientific knowledge; that there is reasonable scientific certainty that there will be no significant effects from the proposed development, either individually or in combination with other plans or projects, adversely affecting the conservation interests or conservation objectives of any Natura 2000 sites. It is therefore concluded that proposed development will not, beyond reasonable scientific doubt, adversely affect the integrity of any Natura 2000 site either directly or indirectly.

6.0 PLANNING APPLICATION DOCUMENTATION

This planning application is being made directly to An Coimisiún Pleanála under the provisions of Section 37E of the 2000 Act. An Coimisiún Pleanála has instructed the Applicant to notify the Office of Public Work, as a prescribed body, of the lodgement of the planning application and to furnish you with a copy (or copies) of the planning application documentation.

All planning application and associated documentation is available to view at the dedicated project website; www.islandmorewindfarmsid.ie; which includes:-

- Planning Application Notification Letters to An Coimisiún Pleanála and Roscommon County Council;
- Planning Application Form;
- Site Notice;
- Newspaper Notices (2 no.);
- Letters of Landowner Consent;
- Statutory Undertaker Letter;
- Environmental Impact Assessment Portal Confirmation Notice;
- Planning Application Notification Letter issued to each prescribed body;
- Planning Application Drawings (see Schedule of Drawings attached to the Planning Application Form);

- Environmental Impact Assessment Report, including:
 - Volume I – Assessment of the Project;
 - Volume II – Technical Annexes in support of Volume I;
 - Non-Technical Summary; and
- Natura Impact Statement.

7.0 PLANNING APPLICATION PROCEDURE

You are advised that An Coimisiún Pleanála may, in respect of an application for permission, decide to:-

- (a) (i) grant the permission/approval; or
- (ii) make such modifications to the proposed development as it specifies in its decision and grant permission/approval in respect of the proposed development as so modified; or
- (iii) grant permission/approval in respect of part of the proposed development (with or without specified modifications of the foregoing kind), and any of the above decisions may be subject to or without conditions; or
- (b) Refuse to grant the permission/approval.

Submissions or observations may be made only to An Coimisiún Pleanála, 64 Marlborough Street, Dublin 1; or via the An Coimisiún Pleanála website www.pleanala.ie/en-ie/observations; relating to:-

- (i) The implications of the proposed development for proper planning and sustainable development;
- (ii) The likely effects on the environment of the proposed development; and
- (iii) The likely significant effects of the proposed development on a European site, if carried out.

Any submissions or observations from the Office of Public Work must be received by An Coimisiún Pleanála no later than 5.30p.m. on 16 December 2026.

8.0 CONCLUSION

This planning application is being lodged with An Coimisiún Pleanála following a determination that the proposed development constitutes a SID. Government policy recognises that onshore wind energy, as a proven and cost effective technology in the context of Ireland's abundant wind resource, will continue to be the major contributor to Ireland's renewable electricity generation to 2030 and the generation of electricity from the proposed development will make a substantial contribution to the reduction of fossil fuel generated electricity and the abatement of greenhouse gas emissions.

The EIAR and NIS submitted with this planning application provide a comprehensive assessment of the likelihood of significant adverse environmental effects arising as a result of the proposed development individually and in combination with other existing, permitted and proposed developments. Overall, it is assessed that any likely adverse environmental effects resulting from the proposed development can be managed and mitigated and that there are lasting social and environmental benefits

as a result of the proposed development.

We trust that the documentation provided is in order and is sufficient for your consideration of this proposed development. Should you have any queries in relation to any of the information enclosed, please do not hesitate to contact this office.
