

20th July 2022

To whom it may concern,

ADVANCE INFORMATION SITE WORKS

South Meath Solar Farm

This letter is to advise you in advance of works scheduled to commence for phase two at the South Meath Solar Farm Project Vesington Co Meath.

Suir Engineering will be commencing enabling works in conjunction with the formation / Installation of Solar Farm Access Roads/Compounds.

We will mobilize on site Monday 25th July. Plant transportation vehicles will be in use, we will endeavor to facilitate this as early as possible on Monday morning to minimize any potential disruption.

Stone deliveries/ haulage will commence on Tuesday 26th July 2022 and will run for approximately 5/6 weeks. At present it is anticipated having 4 number vehicles delivering stone to site.

Access to and from the site will be via a one-way system. The delivery vehicles will leave the M3 at Junction 5 (Dunboyne) and travel along the R157 for approximately 2km before turning right onto the R156. From here the vehicles will travel for around 3km until they take a right turn onto the L6222 where they will travel approximately 0.5km to site Section 1 South Field Entrance and 1km to site section 2 North Field Entrance. Both site entrances will be a left-hand turn from the L6222. On exit from the site delivery vehicles will be prompted to turn left only when leaving site and travel north along the L6222 to avoid any conflict on this slightly narrow road.

- Nallys opening up of the Bellmouth at the Northern entrance. (Pending the pole being fixed and approval of RAMs) Proposed start date 03/10/22
- Brennan fencing to commence in the Northern section. (Minimal disruption) Proposed start date 06/10/22
- Nallys to commence internal roads and RMU bases. (Frequent delivery of stone) Proposed start date 05/10/22

A map of the proposed route to site entrance 1 and 2 is attached below

All traffic movements will be carried out between the hours of 08.00 to 18.00 Monday to Friday and 08.00 to 13.00 Saturdays

We thank you in advance for your patience and cooperation during these essential works. If you have any questions, please feel free to contact us.

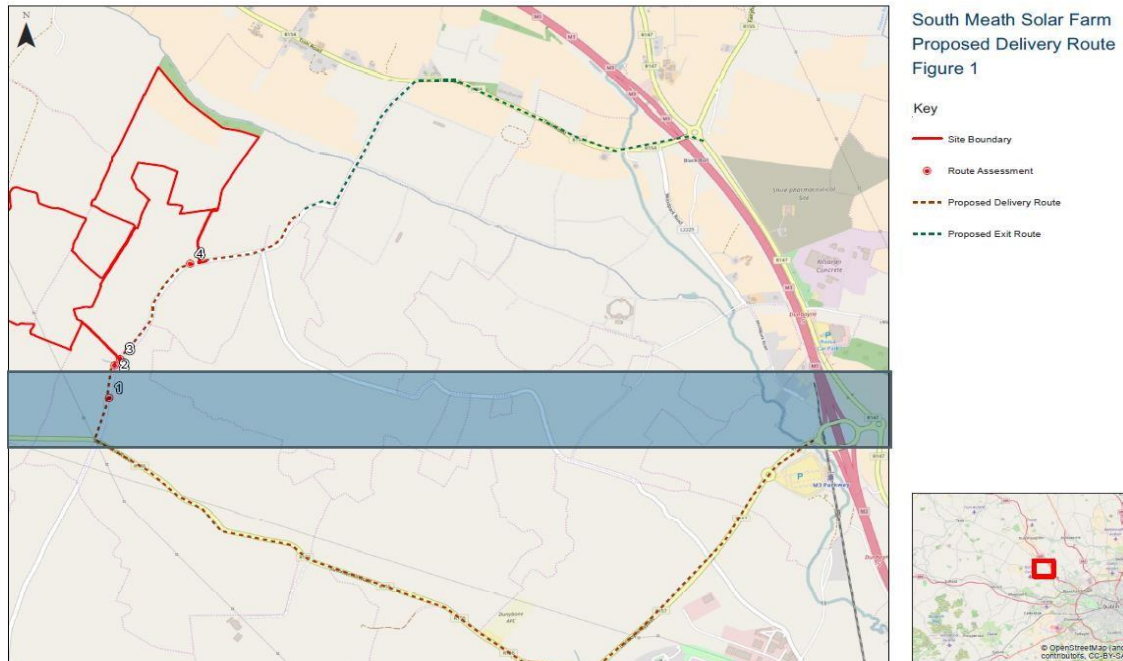

John Lowry Statkraft Community Liaison Officer - 0874296496

Colm Sherry Suir Engineering Logistics Manager - 0871686412

Robert O' Neill – Suir Engineering EHS Advisor – 0871746902
